

EPA Publishes its New Biogas Toolkit!

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to inform our Partners and other interested stakeholders about a **new EPA resource from AgSTAR, LMOP and the Global Methane Initiative (GMI)**.

The [EPA Biogas Toolkit](#) serves as a centralized knowledge hub for biogas project stakeholders. The toolkit is designed to allow stakeholders to **search and browse for information and resources** that meet their specific project needs. It includes **more than 30 tools and resources compiled from several EPA programs**, including AgSTAR, LMOP and GMI.

The toolkit can be used as a roadmap for planning and implementing biogas projects and quantifying their economic and environmental impacts, and offers various filters to help stakeholders find the appropriate resources for their main interests.

To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the [LMOP website](#). Thank you.
