POLLUTION PREVENTION

List C: EPA's Registered Antimicrobial Products Effective Against Human HIV-1 Virus

Date: 09/16/2020

Before applying any EPA-registered disinfectant product, users must read the label to determine if the product is approved for the intended-use site or pest. This disinfectant list is not an exhaustive list of all the products that are approved for this particular pest. If you would like to review the product label information for any of these products, please visit EPA's [Pesticide Product Label System](#). Inclusion of products in these lists does not constitute an endorsement of one product over another.

All EPA-registered pesticides must have an EPA Registration Number or Reg. No. displayed on the product label. An individual pesticide product may be marketed and sold under a variety of names. If you are seeking additional information about a pesticide product, refer to the EPA Reg. No., found on the product label, not the brand name. Alternative brand names have the same EPA Registration Number as the primary product. The EPA Reg. No. of a primary product consists of two set of numbers separated by a hyphen, for example EPA Reg. No. 12345-12. The first set of numbers refers to the company identification number, and the second set of numbers represents the product number.

In addition to primary products, distributors may also sell products with identical formulations and identical efficacy as the primary product, known as a "distributor product." Distributor products frequently use different brand names, but you can identify them by their three-part EPA Reg. No. The first two parts of the EPA Reg. No. match the primary product, plus a third set of numbers that represents the Distributor ID number. For example, EPA Reg. No. 12345-12-2567 is a distributor product with an identical formulation and efficacy to the primary product with the EPA Reg. No. 12345-12.

If you hold the primary registration for a product you believe should be added to a disinfectant list, please [email the disinfectant team](#). In the subject line of your email include: "Include Product(s) on List [Insert list Identifier]; [Registration #(s)]." In the body, identify the Company Name, Registration Number(s), and primary brand name(s) of the product(s). Please include a

copy of the label with the claims highlighted. Your request will be reviewed and the list will be revised, accordingly. EPA updates these registered disinfectant lists periodically to reflect label changes, cancellations, and transfers of product registrations. Information in the lists does not constitute a label replacement.

Questions? Please contact pesticidequestions@epa.gov
