Cylinder concentration ranges accepted:

- 25 – 100 ppm for SO₂ and NO_x
- 2500 – 10,000 ppm for CO

If you have lower ranges, please let us know. We may be able to accommodate those, also.

Note:

Please remember to fill out the chain of custody form, and send in a copy of the producer certificate with the cylinder. Due to reduced analytical capacity we may not be able to schedule all requests. Assay capacity will increase when Region 4 becomes operational. Thanks!
