## **Northern Front Range Air Quality Study (NFRAQS)**

Winter 1995/1996; November 1996 - February 1997

Description: PM<sub>2.5</sub> sampling with extended organic speciation to apportion carbon sources; 24-h, 12-h & 6-h PM samples were collected; robust analysis to help understand Denver's Brown Cloud phenomenon.

Watson, J.G., E.M. Fujita, J.C. Chow, B. Zielinska, L.W. Richards, W.D. Neff, and D. Dietrich (1998). Northern Front Range Air Quality Study. Final report. Prepared for Colorado State University, Fort Collins, CO by Desert Research Institute, Reno, NV.

An Executive Summary ([NFRAQS ExecSummary.pdf](#)) was drafted in January 2001.

NFRAQS reports and data files are available at the following web site.
