

Join us for:

Phosphorous Reduction in the Mystic River Watershed 101

(Virtual) workshops for municipalities in the Mystic River Watershed

What: Free information and discussion sessions on how to make progress to meet the new alternative TMDL for the Mystic River. Sessions will include high level context from EPA and MassDEP, local case examples from within the Mystic Watershed, and time for participant discussion and exploration of the opportunities and challenges of enhancing water quality in the Mystic

Participants: All municipal staff, community leaders, representatives of non-profits, and volunteers who work on water quality and related topics in the Mystic River Watershed are welcome to attend

Why: To learn in a casual, interactive setting about strategies for making progress from other Mystic municipalities, EPA and MassDEP

Hosts: EPA Region 1, MassDEP, and other issue experts are hosting these sessions

Easy to Install & Maintain Green Infrastructure

- **When:** November 2, 2020 @ 10:00 AM – 12:00 PM ET
- **Presenters:** Wayne Chouinard & Emily Sullivan, Arlington; Jamie Houle, UNH Stormwater Center
- **Description:** How can municipalities start to install affordable, simple to install green infrastructure? Participants will learn about designs being used today in Arlington and other places, along with estimated costs and Phosphorous reduction estimates.

Effective Non-structural Practices

- **When:** November 16, 2020 @ 10:00 AM – 12:00 PM ET
- **Presenters:** Catherine Woodbury, Cambridge; Mark Voorhees, EPA Region I
- **Description:** What street sweeping and catchment cleaning regimes work best for reducing Phosphorous? How are Mystic municipalities and others educating their residents about safe fertilizer use? What are some best management strategies to manage leaf litter?

Funding Your Program

- **When:** November 30, 2020 @ 9:00 – 11:00 AM ET
- **Presenters:** Alex Rozycki, Reading; Laura Schiffman, MassDEP; Anne Leiby, EPA Region I Compliance Assistance
- **Description:** How can municipalities fund their stormwater programs? What strategies have worked well in building community awareness and buy in? What is current best practice around stormwater enterprise funds and what can we learn from local communities?
