NOTES	EXPLANATION
---	No sample received in lab
Invalid	Sample did not meet Field or Laboratory Acceptance Criteria, for example the sample did not pass leak check
ND	Concentration not detected
<i>Italicized</i>	<i>Concentration below method detection limit</i>
NA	Continuous Air Monitor was not installed at this location on this date
Manually Triggered	Result in Bold and Gray As an instrument quality check starting October 1, 2020, any continuous monitor that has not collected a canister sample within seven days, will be manually triggered
(collocate)	Results are from continuous air monitors in operation at the same location
(replicate)	Replicate analysis from the same canister sample used as a quality check

Method detection limit (ppbv) = 0.0086

Method detection limit ($\mu\text{g}/\text{m}^3$) = 0.031
