

The EPA Administrator, Andrew R. Wheeler, signed the following notice on 12/21/2020, and EPA is submitting it for publication in the *Federal Register* (FR). While we have taken steps to ensure the accuracy of this Internet version of the rule, it is not the official version of the rule for purposes of compliance. Please refer to the official version in a forthcoming FR publication, which will appear on the Government Printing Office's govinfo website (<https://www.govinfo.gov/app/collection/fr>) and on Regulations.gov (<https://www.regulations.gov>) in Docket No. EPA-HQ-OAR-2020-0037. Once the official version of this document is published in the FR, this version will be removed from the Internet and replaced with a link to the official version.

RIN 2060-AU61

Air Quality Designations for the 2010 Primary Sulfur Dioxide (SO₂) National Ambient Air Quality Standard - Round 4

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This final rule establishes the initial air quality designations for certain areas in the United States (U.S.) for the 2010 primary sulfur dioxide (SO₂) National Ambient Air Quality Standard (NAAQS). The Environmental Protection Agency (EPA) is designating the areas as either nonattainment, attainment/unclassifiable, or unclassifiable. The designations are based on application of the EPA's nationwide analytical approach and technical analysis, including evaluation of monitoring data and air quality modeling, to determine the appropriate designation and area boundary based on the weight of evidence for each area. The Clean Air Act (CAA or Act) directs areas designated as nonattainment to undertake certain planning and pollution control activities to attain the SO₂ NAAQS as expeditiously as practicable. This is the fourth and final set of actions to designate areas of the U.S. for the 2010 SO₂ NAAQS; there are no remaining undesignated areas in the U.S. for the 2010 SO₂ NAAQS.

DATES: The final rule is effective on April 30, 2021.

ADDRESSES: The EPA has established a public docket for these SO₂ designations at <https://www.regulations.gov> under Docket ID No. EPA-HQ-OAR-2020-0037.¹ Although listed in the docket index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form.

Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are currently closed to the public, with limited exceptions, to reduce the risk of transmitting COVID-19. The Docket Center staff will continue to provide remote customer service via email, phone, and webform. For further information on EPA Docket Center services and the current status, please visit us online at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: For general questions concerning this action, please contact Corey Mocka, U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Air Quality Policy Division, 109 T.W. Alexander Drive, Mail Code C539-04, Research Triangle Park, NC 27711; telephone: (919) 541-5142; email address: mocka.corey@epa.gov. The following EPA contacts can answer questions regarding areas in a particular EPA Regional office:

Region 2 – Marina Castro, telephone (212) 637-3713, email at castro.marina@epa.gov.

Region 3 – Megan Goold, telephone (215) 814-2027, email at goold.megan@epa.gov.

Region 4 – Twunjala Bradley, telephone (404) 562-9352, email at bradley.twunjala@epa.gov.

I. Preamble Glossary of Terms and Acronyms

The following are abbreviations of terms used in the preamble.

APA	Administrative Procedure Act
CAA	Clean Air Act
CFR	Code of Federal Regulations
CRA	Congressional Review Act
D.C.	District of Columbia
DRR	Data Requirements Rule
EPA	Environmental Protection Agency
FR	Federal Register
NAAQS	National Ambient Air Quality Standards
NTTAA	National Technology Transfer and Advancement Act
ppb	Parts per billion
PRA	Paperwork Reduction Act
RFA	Regulatory Flexibility Act
SIP	State Implementation Plan
SO ₂	Sulfur Dioxide
TAR	Tribal Authority Rule
TSD	Technical Support Document
UMRA	Unfunded Mandate Reform Act
U.S.	United States

II. What is the purpose of this action?

The purpose of this final action is to announce and promulgate initial air quality designations for certain areas in the U.S. for the 2010 SO₂ NAAQS, in accordance with the requirements of the CAA. The EPA is designating areas as either nonattainment, attainment/unclassifiable, or unclassifiable, as defined in Section IV of this action, and based on evaluating any available information that was timely received, including (but not limited to) appropriate monitoring data and modeling analyses.

On June 2, 2010, the EPA Administrator signed a final rule that revised the primary SO₂ NAAQS (75 FR 35520; June 22, 2010) after review of the existing primary SO₂ standards

promulgated on April 30, 1971 (36 FR 8187). The EPA established the revised primary SO₂ NAAQS at 75 parts per billion (ppb) which is attained when the 3-year average of the annual 99th percentile of daily maximum 1-hour average concentrations of SO₂ does not exceed 75 ppb.

The process for designating areas following promulgation of a new or revised NAAQS is contained in the CAA section 107(d) (42 U.S.C. 7407(d)). After promulgation of a new or revised NAAQS, each governor shall recommend air quality designations, including the appropriate boundaries for nonattainment areas, to the EPA.² The EPA considers these recommendations as part of its duty to promulgate the formal area designations and boundaries for the new or revised NAAQS. By no later than 120 days prior to promulgating designations, the EPA is required to notify states, territories, and tribes, as appropriate, of any intended modifications to an area designation or boundary recommendation that the EPA deems necessary.

After invoking a 1-year extension of the deadlines to designate areas, as provided for in section 107 of the Act, the EPA completed an initial round of SO₂ designations for certain areas of the country on July 25, 2013 (referred to as “Round 1”).³ Following the initial designations, three lawsuits were filed against the EPA in different U.S. District Courts, alleging the agency had failed to perform a nondiscretionary duty under the CAA by not designating all portions of the country by the June 2, 2013, deadline. In one of those cases, on March 2, 2015, the U.S.

² Tribes are invited to submit recommendations following promulgation of a new or revised NAAQS but are not required to do so.

³ A total of 29 areas throughout the U.S. were designated in this action published on August 5, 2013 (78 FR 47191). The EPA designated all 29 areas nonattainment based on violating monitored SO₂ concentrations from Federal Reference Method and Federal Equivalent Method monitors that are sited and operated in accordance with 40 CFR parts 50 and 58 and did not at that time designate any other areas.

District Court for the Northern District of California entered an enforceable order for the EPA to complete the area designations by three specific deadlines according to the court-ordered schedule.⁴

To meet the first court-ordered deadline, the Administrator signed final actions on June 30, 2016, and November 29, 2016, (collectively referred to as “Round 2”) designating additional areas.⁵ To meet the second deadline of the court-ordered schedule, the Administrator signed final actions on December 21, 2017, and March 28, 2018, (collectively referred to as “Round 3”) designating most of the remaining areas of the country.⁶ Finally, the EPA is under a December 31, 2020, court-ordered deadline, the final of the three deadlines established by the court, to designate all remaining undesignated areas (collectively referred to as “Round 4” or the “final round”). These remaining undesignated areas are: (1) Those areas which, under the court order, did not meet the criteria that required designation in Round 2 and also were not required to be designated in Round 3 due to installation and operation of a new SO₂ monitoring network by January 2017 in the area meeting EPA’s specifications referenced in EPA’s SO₂ Data Requirements Rule (DRR);⁷ and (2) those areas which EPA has not otherwise previously designated for the 2010 SO₂ NAAQS. With the completion of Round 4, there are no remaining undesignated areas for the 2010 SO₂ NAAQS.

⁴ *Sierra Club v. McCarthy*, No. 3-13-cv-3953 (SI) (N.D. Cal. March 2, 2015).

⁵ A total of 65 areas throughout the U.S. were designated in these actions published on July 12, 2016 (81 FR 45039), and December 13, 2016 (81 FR 89870). Of these 65 areas, seven were designated nonattainment.

⁶ Most remaining areas of the U.S. were designated in actions published on January 9, 2018 (83 FR 1098) and April 5, 2018 (83 FR 14597). Of these areas, six were designated nonattainment.

⁷ See 80 FR 51052 (August 21, 2015), codified at 40 CFR part 51, subpart BB.

On or about August 13, 2020, consistent with section 107(d)(1)(b)(ii) of the CAA, the EPA notified affected states of its intended designation of certain specific areas as either nonattainment, attainment/unclassifiable, or unclassifiable for the 2010 SO₂ NAAQS. These states then had the opportunity to demonstrate why they believed an intended modification of their original (or updated) recommendations by the EPA may be inappropriate. Although not required under the CAA, the EPA also chose to provide an opportunity for members of the public to comment on the EPA's August 2020 intended designations, as the EPA had done for the first, second, and third rounds of SO₂ designations. The EPA published a notice of availability and public comment period for the Round 4 intended designations on August 21, 2020 (85 FR 51694), and the public comment period closed on September 21, 2020.

The final Round 4 2010 SO₂ NAAQS designations and the boundaries of each area appear in the tables for each state within the regulatory text at the end of this document. State recommendations, EPA's August 2020 designation notification letters, and the subsequent state and public comments, are available in the public docket for these SO₂ designations at <https://www.regulations.gov> under Docket ID No. EPA-HQ-OAR-2020-0037. As described in Section VI of this action, the EPA may consider early certified 2018-2020 monitoring data that may be submitted to the appropriate EPA Regional office by February 15, 2021.

For the areas being designated nonattainment, the CAA directs states to develop and submit State Implementation Plans (SIPs) to the EPA within 18 months of the effective date of this final rule, that meet the requirements of sections 172(c) and 191-192 of the CAA and provide for attainment of the NAAQS as expeditiously as practicable, but not later than 5 years from the effective date of final designation.

III. What is the 2010 SO₂ NAAQS and what are the health concerns that it addresses?

The EPA revised the primary SO₂ NAAQS in a final rule published in the *Federal Register* on June 22, 2010 (75 FR 35520), which became effective on August 23, 2010.⁸ Based on review of the air quality criteria for oxides of sulfur and the primary NAAQS for oxides of sulfur as measured by SO₂, the EPA revised the primary SO₂ NAAQS to provide requisite protection of public health with an adequate margin of safety. Specifically, the EPA established a new 1-hour SO₂ standard at a level of 75 ppb, which is met at an ambient air quality monitoring site when the 3-year average of the annual 99th percentile of daily maximum 1-hour average concentrations is less than or equal to 75 ppb, as determined in accordance with Appendix T of 40 CFR part 50, 40 CFR 50.17(a) and (b). The EPA also established provisions to revoke both the existing 24-hour and annual primary SO₂ standards, subject to certain conditions, 40 CFR 50.4(e).

Current scientific evidence links short-term exposures to SO₂, ranging from 5 minutes to 24 hours, with an array of adverse respiratory effects including bronchoconstriction and increased asthma symptoms. These effects are particularly important for asthmatics at elevated ventilation rates (*e.g.*, while exercising or playing). Studies also show a connection between short-term exposure and increased visits to emergency departments and hospital admissions for

⁸ Based on the EPA's review of the air quality criteria addressing human health effects and the primary NAAQS for SO₂, the agency took final action to retain the current standard without revision in a final action published in the *Federal Register* on March 18, 2019 (52 FR 9866).

respiratory illnesses, particularly in at-risk populations including children, the elderly and asthmatics.

IV. What are the CAA requirements for air quality designations and what action has the EPA taken to meet these requirements?

After the EPA promulgates a new or revised NAAQS, the EPA is required to designate all areas of the country as either nonattainment, attainment, or unclassifiable, for that NAAQS pursuant to section 107(d)(1)-(2) of the CAA. As part of these Round 4 designations, the EPA is implementing its interpretation of statutory terms under CAA section 107(d) nationwide and is basing these designations on the EPA's nationwide analytical approach and technical analysis, including evaluation of monitoring data and air quality modeling, applied to the available evidence that was timely received for each area.

Regarding statutory definitions and the EPA's interpretations of such, section 107(d)(1)(A)(i) of the CAA defines a *nonattainment* area as an area that does not meet the NAAQS or that contributes to a nearby area that does not meet the NAAQS. An *attainment* area is defined by the CAA as any area that meets the NAAQS and does not contribute to a nearby area that does not meet the NAAQS. *Unclassifiable* areas are defined by the CAA as those that cannot be classified on the basis of available information as meeting or not meeting the 2010 SO₂ NAAQS.

For the purpose of this action for the 2010 SO₂ NAAQS, the EPA has interpreted and applied the statutory definitions as follows. The EPA defines a *nonattainment* area as an area that, based on available information including (but not limited to) monitoring data and/or appropriate modeling analyses, EPA has determined either: (1) does not meet the 2010 SO₂

NAAQS, or (2) contributes to ambient air quality in a nearby area that does not meet the 2010 SO₂ NAAQS.

In this action, an *attainment/unclassifiable* area is defined by the EPA as an area that, based on available information including (but not limited to) appropriate monitoring data and/or appropriate modeling analyses, EPA has determined meets the 2010 SO₂ NAAQS and does not likely contribute to ambient air quality in a nearby area that does not meet the 2010 SO₂ NAAQS.

In this action, an *unclassifiable area* is defined by the EPA as an area for which the available information does not allow the EPA to determine whether the area meets the definition of a nonattainment area or the definition of an attainment/unclassifiable area.

This nationwide analytical approach also includes but is not limited to: 1) EPA's interpretations of other terms in the context of Round 4 of the 2010 SO₂ NAAQS; 2) the appropriate basis for characterizing the air quality of an area; 3) the five-factor analysis (described in Section V of this action) to determine the boundaries for each air quality area under the NAAQS; and 4) the methodology for appropriately characterizing SO₂ air quality through monitoring or modeling.

The EPA notes that CAA section 107(d) provides the agency with discretion to determine how best to interpret the terms in the definition of a nonattainment area (e.g., “contributes to” and “nearby”) for a new or revised NAAQS, given considerations such as the nature of a specific pollutant, the types of sources that may contribute to violations, the form of the standards for the pollutant, and other relevant information. In particular, the EPA's position is that the statute does

not require the agency to establish bright line tests or thresholds for what constitutes “contribution” or “nearby” for purposes of designations.⁹

Similarly, the EPA’s position is that the statute permits the EPA to evaluate the appropriate application of the term “area” to include geographic areas based upon full or partial county boundaries, as may be appropriate for a particular NAAQS. For example, CAA section 107(d)(1)(B)(ii) explicitly provides that the EPA can make modifications to designation recommendations for an area “or portions thereof,” and under CAA section 107(d)(1)(B)(iv) a designation remains in effect for an area “or portion thereof” until the EPA redesignates it.

By no later than 1 year after the promulgation of a new or revised NAAQS, CAA section 107(d)(1)(A) provides that each state governor shall recommend air quality designations, including the appropriate boundaries for areas, to the EPA. The EPA reviews those recommendations and is authorized to make any modifications the Administrator deems necessary. The statute does not define the term “necessary,” but the EPA interprets this to authorize the Administrator to modify designations that did not meet the statutory requirements or were otherwise inconsistent with the facts or analysis deemed appropriate by the Administrator. If the EPA is considering modifications to a recommendation, we are required by CAA section 107(d)(1)(B)(ii) to notify the state of any such intended modifications not less than 120 days prior to our promulgation of the final designation. These notifications are commonly known as the “120-day letters.” During this period, if the state or territory does not agree with the EPA’s proposed modification, it has an opportunity to respond to the EPA and to demonstrate why it believes the modification proposed by the EPA is inappropriate. If a state or

⁹ This view was confirmed in *Catawba County v. EPA*, 571 F.3d 20 (D.C. Cir. 2009).

territory fails to provide any recommendation for an area, in whole or in part, the EPA still must promulgate a designation that the Administrator deems appropriate, pursuant to CAA section 107(d)(1)(B)(ii). While CAA section 107(d) specifically addresses the designations process between the EPA and states and territories, the EPA intends to follow the same process to the extent practicable for tribes that submitted designation recommendations.

V. What guidance did the EPA issue and how did the EPA apply the statutory requirements to determine area designations and boundaries?

In the notice of proposed rulemaking for the revised SO₂ NAAQS (74 FR 64810; December 8, 2009), the EPA issued proposed guidance on our approach to implementing the standard, including our approach to initial area designations. The EPA solicited comment on that guidance and, in the notice of final rulemaking (75 FR 35520; June 22, 2010), provided further guidance concerning implementation of the standard and how to identify nonattainment areas and boundaries for the SO₂ NAAQS. Subsequently, on March 24, 2011, the EPA provided additional designations guidance to assist states with making their recommendations for area designations and boundaries.¹⁰ The EPA also issued two additional designations guidance documents on March 20, 2015, and July 22, 2016, specific to Round 2 and Round 3 processes and schedules, respectively.¹¹

¹⁰ See, “Area Designations for the 2010 Revised Primary Sulfur Dioxide National Ambient Air Quality Standards,” memorandum to Regional Air Division Directors, Regions I-X, from Stephen D. Page, dated March 24, 2011, available at https://www3.epa.gov/ttn/naaqs/aqmguidance/collection/cp2/20110324_page_so2_designations_guidance.pdf.

¹¹ See “Updated Guidance for Area Designations for the 2010 Primary Sulfur Dioxide National Ambient Air Quality Standard,” memorandum to Regional Air Division Directors, Regions 1-10, from Stephen D. Page, dated March 20, 2015, available at <https://www.epa.gov/sites/production/files/2016-04/documents/20150320so2designations.pdf>,

An updated designations guidance document was issued by the EPA on September 5, 2019, to better reflect the Round 4 2010 SO₂ NAAQS designations process and to supplement, where necessary, prior designations guidance documents.¹² This memorandum identifies factors that the EPA intended to evaluate in determining whether areas are in violation of the 2010 SO₂ NAAQS. The document also contains the factors that the EPA intended to evaluate in determining the boundaries for all remaining undesignated areas in the country. These factors include: 1) air quality characterization via ambient monitoring and/or dispersion modeling results; 2) emissions-related data; 3) meteorology; 4) geography and topography; and 5) jurisdictional boundaries.¹³

VI. What air quality information has the EPA used for these designations?

These designations are based on the EPA's application of the nationwide analytical approach to, and technical assessment of, the weight of evidence for each area, including but not limited to available air quality monitoring data and related air quality modeling results. With respect to air quality monitoring data, the EPA has considered data from at least the most recent

and "Area Designations for the 2010 Primary Sulfur Dioxide National Ambient Air Quality Standard – Round 3," memorandum to Regional Air Division Directors, Regions 1-10, dated July 22, 2016, available at <https://www.epa.gov/sites/production/files/2016-07/documents/areadesign.pdf>.

¹² See "Area Designations for the 2010 Primary Sulfur Dioxide National Ambient Air Quality Standard – Round 4," memorandum to Regional Air Division Directors, Regions 1-10, from Peter Tsirigotis, dated September 5, 2019, available at https://www.epa.gov/sites/production/files/2019-09/documents/round_4_so2_designations_memo_09-05-2019_final.pdf.

¹³ The EPA supplemented this guidance with documents first made available to states and other interested parties in 2013 and updated in 2016. See SO₂ NAAQS Designations Source-Oriented Monitoring Technical Assistance Document (February 2016), available at <https://www.epa.gov/sites/production/files/2016-06/documents/so2monitoringtad.pdf>, and SO₂ NAAQS Designations Modeling Technical Assistance Document (August 2016), available at <https://www.epa.gov/sites/production/files/2016-06/documents/so2modelingtad.pdf>.

three full calendar years, *i.e.*, 2017-2019. The 1-hour primary SO₂ standard is violated at an ambient air quality monitoring site when the 3-year average of the annual 99th percentile of the daily maximum 1-hour average concentrations of SO₂ exceeds 75 ppb, as determined in accordance with Appendix T of 40 CFR part 50.

In the EPA's September 2019 memorandum, we noted that Round 4 area designations are based primarily on ambient monitoring data, including data from existing and new EPA-approved monitors that have collected data at least from January 2017 forward, pursuant to the DRR. In addition, the EPA may evaluate related air dispersion modeling submitted by state air agencies for two specific circumstances. First, states may submit air dispersion modeling of actual or allowable emissions to support the geographic extent of a nonattainment boundary. Second, states may submit air dispersion modeling of allowable emissions to demonstrate that new permanent and federally-enforceable SO₂ emissions limits that subject sources are meeting provide for attainment of the NAAQS and represent a more accurate characterization of current air quality at the time of designation than does monitoring data reflecting past air quality that does not account for compliance with new limits and associated enforceable emissions reductions.

The deadline for Round 4 designations and the practical difficulties of obtaining complete, quality-assured, certified SO₂ monitoring data for the entirety of calendar year 2020 in December 2020, make the EPA's use of final 2020 monitoring data for this action generally impracticable. Under normal circumstances, under the applicable regulations, the deadline for states to certify monitoring data for calendar year 2020 is May 1, 2021. However, because these designations are being promulgated at the end of calendar year 2020, and because states can make complete, quality-assured, certified 2020 data available for some areas quickly in 2021, to

address the impracticability problem, the EPA is providing a process by which state-certified 2020 monitoring data that become available early in 2021 could be used in the Round 4 designations process.

Provided that this document is published in the *Federal Register* no later than March 31, 2021, the final Round 4 SO₂ designations announced in this action will be effective on April 30, 2021. If any state submits complete, quality-assured, certified 2020 data (*i.e.*, monitoring data from EPA's Air Quality System) to the appropriate EPA Regional office by February 15, 2021, supporting a change of the designation status for any Round 4 area within that state, and the EPA agrees that a change of designation status is appropriate, we will withdraw the designation announced in this action for such area and issue another designation that reflects the inclusion and analysis of such information. Any designation modification will occur in a separate *Federal Register* action prior to the April 30, 2021, effective date. We emphasize that EPA will conduct this process only for those states that submit the necessary information by the deadline of February 15, 2021, and in those instances where we can complete our analysis of the information and effect the change of designation status before the original effective date established by this final action.

VII. How do the Round 4 designations affect areas of Indian country?

There are no violating monitors for areas of Indian country, so no areas of Indian country are being designated as nonattainment or unclassifiable in Round 4. Any other parts of Indian country being designated as attainment/unclassifiable are being designated along with the surrounding state area.

VIII. Where can I find information forming the basis for this rule and exchanges between the EPA, states, and tribes related to this rule?

Information and data providing the basis for this action are provided in a final designations technical support document (TSD)¹⁴ included in the docket. The final designations TSD, intended designations TSD, modeling files, technical assistance documents, applicable EPA memoranda, public comments, and copies of correspondence regarding this process between the EPA and the states, territories, tribes, and other parties, are available for review at the public docket for these SO₂ designations at <https://www.regulations.gov> under Docket ID No. EPA-HQ-OAR-2020-0037.

The EPA has also established a Web site for the initial SO₂ designations rulemakings at: <https://www.epa.gov/sulfur-dioxide-designations>. The Web site includes the EPA's final SO₂ designations, as well as state recommendation letters, the EPA's 120-day intended designations notification letters, technical support documents, responses to comments, and other related technical information. Air dispersion modeling input and output files are too large to post in the docket or on the Web site and must be requested from the EPA Docket Office or the Regional office contacts listed in the **FOR FURTHER INFORMATION CONTACT** section of this action.

¹⁴ The single final TSD for this action consists of a few sections with information that applies to all affected areas or to certain groups of areas with some common features, and many sections that are specific to individual state areas. For convenience, the term "TSD" is also used generically to refer to these state-specific sections. For informational purposes, these individual state-specific sections/TSDs are available for separate downloading from the indicated EPA Web site.

IX. Environmental Justice Concerns

When the EPA establishes a new or revised NAAQS, the CAA requires the EPA to designate all areas of the U.S. as either nonattainment, attainment, or unclassifiable. This action addresses designation determinations for certain areas for the 2010 SO₂ NAAQS. Area designations address environmental justice concerns by ensuring that the public is properly informed about the air quality in an area. In locations where air quality does not meet the NAAQS, the CAA requires relevant state authorities to initiate appropriate air quality management actions to ensure that all those residing, working, attending school, or otherwise present in those areas are protected, regardless of minority and economic status.

X. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is exempt from review by the Office of Management and Budget because it responds to the CAA requirement to promulgate air quality designations after promulgation of a new or revised NAAQS.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is not an Executive Order 13771 regulatory action because air quality designations after promulgating a new revised NAAQS are exempt under Executive Order 12866.

C. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA. This action fulfills the non-discretionary duty for the EPA to promulgate air quality designations after promulgation of a new or revised NAAQS and does not contain any information collection activities.

D. Regulatory Flexibility Act (RFA)

This designation action under CAA section 107(d) is not subject to the RFA. The RFA applies only to rules subject to notice-and-comment rulemaking requirements under the Administrative Procedures Act (APA), 5 U.S.C. 553, or any other statute. Section 107(d)(2)(B) of the CAA explicitly provides that designations are exempt from the notice-and-comment provisions of the APA. In addition, designations under CAA section 107(d) are not among the list of actions that are subject to the notice-and-comment rulemaking requirements of CAA section 307(d).

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538 and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The division of responsibility between the federal government and the states for purposes of implementing the NAAQS is established under the CAA.

G. Executive Order 13175: Consultation and Coordination with Indian Tribal Government

This action does not have tribal implications, as specified in Executive Order 13175. This action concerns the designation of certain areas in the U.S. for the 2010 SO₂ NAAQS. The CAA provides for states, territories, and eligible tribes to develop plans to regulate emissions of air pollutants within their areas, as necessary, based on the designations. The Tribal Authority Rule (TAR) provides tribes the opportunity to apply for eligibility to develop and implement CAA programs, such as programs to attain and maintain the SO₂ NAAQS, but it leaves to the discretion of the tribe the decision of whether to apply to develop these programs and which programs, or appropriate elements of a program, the tribe will seek to adopt. This rule does not have a substantial direct effect on one or more Indian tribes. It would not create any additional requirements beyond those of the SO₂ NAAQS. This rule establishes the designations for certain areas of the country for the 2010 SO₂ NAAQS, but no areas of Indian country are being designated as nonattainment by this action. Furthermore, this rule does not affect the relationship or distribution of power and responsibilities between the federal government and Indian tribes. The CAA and the TAR establish the relationship of the federal government and tribes in developing plans to attain the NAAQS, and this rule does nothing to modify that relationship. Thus, Executive Order 13175 does not apply.

Although Executive Order 13175 does not apply to this rule, after the EPA promulgated the 2010 primary SO₂ NAAQS, the EPA communicated with tribal leaders and environmental staff regarding the designations process. In 2011, the EPA also sent individualized letters to all federally recognized tribes to explain the designation process for the 2010 SO₂ NAAQS, to provide the EPA designations guidance, and to offer consultation with the EPA. The EPA provided further information to tribes through presentations at the National Tribal Forum and through participation in National Tribal Air Association conference calls. The EPA also sent

individualized letters to all federally recognized tribes that submitted recommendations to the EPA about the EPA's intended Round 1 designations for the SO₂ standard and offered tribal leaders the opportunity for consultation.¹⁵ These communications provided opportunities for tribes to voice concerns to the EPA about the general designations process for the 2010 SO₂ NAAQS, as well as concerns specific to a tribe, and informed the EPA about key tribal concerns regarding designations as the designations process was under development and through its implementation up to that point. For the second, third, and fourth rounds of SO₂ designations, the EPA sent additional letters to tribes that could potentially be affected and offered additional opportunities for participation in the designations process.

H. Executive Order 13045: Protection of Children from Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of "covered regulatory action" in section 2-202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution or Use

¹⁵ These communication letters to the tribes are provided in the dockets for Round 1 (Docket ID NO. EPA-HQ-OAR-2012-0233, Round 2 (Docket ID NO. EPA-HQ-OAR-2014-0464), and Round 3 (Docket ID NO. EPA-HQ-OAR-2017-0003).

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

This action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The documentation for this determination is contained in Section IX of this action, “Environmental Justice Concerns.”

L. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the U.S. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

M. Judicial Review

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the Court of Appeals for the District of Columbia Circuit: (i) when the agency action consists of “nationally applicable regulations promulgated, or final actions taken, by the Administrator,” or (ii) when such action is locally or regionally applicable, if “such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination.”

This final action is nationally applicable. To the extent a court finds this final action to be locally or regionally applicable, the EPA finds that this action is based on a determination of “nationwide scope or effect” within the meaning of CAA section 307(b)(1). This final action establishes designations for the 2010 SO₂ NAAQS for certain areas across the U.S., located in 21 states, nine EPA Regions, and 10 federal judicial circuits. This final action is also based on a common core of determinations applied to areas across the country, including the EPA’s nationwide analytical approach to and technical analysis of evaluating monitoring data and air quality modeling within the EPA’s interpretation of statutory terms in the CAA such as the definitions of nonattainment, attainment, and unclassifiable under section 107(d)(1) of the CAA. For these reasons, this final action is nationally applicable or, alternatively, to the extent a court finds this action to be locally or regionally applicable, the Administrator has determined that this final action is based on a determination of nationwide scope or effect for purposes of CAA section 307(b)(1) and is hereby publishing that finding in the *Federal Register*.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the District of Columbia Circuit within 60 days from the date this final action is published in the *Federal Register*. Filing a petition for reconsideration by the Administrator of this final action does not affect the finality of the action for the purposes of judicial review, nor does it extend the time within which a petition for judicial review must be filed, and shall not postpone the effectiveness of such rule or action.

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Dated:

Andrew Wheeler,
Administrator.

For the reasons set forth in the preamble, 40 CFR part 81 is amended as follows:

PART 81--DESIGNATIONS OF AREAS FOR AIR QUALITY PLANNING PURPOSES

1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, et. seq.

Subpart C-Section 107 Attainment Status Designations

2. In §81.301, the table entitled “Alabama–2010 Sulfur Dioxide NAAQS [Primary]” is amended by removing footnote 3 from the table and the entry “Shelby County (part)” and adding the entry “Shelby County (remainder)” in alphabetical order to read as follows:

§81.301 Alabama.

* * * * *

Alabama–2010 Sulfur Dioxide NAAQS

[Primary]

Designated area ¹	Designation	
	Date ²	Type
* * *	* *	* *
Shelby County (remainder)	4/30/2021	Attainment/Unclassifiable.
* * *	* *	* *

¹Includes any Indian country in each county or area, unless otherwise specified. EPA is not determining the boundaries of any area of Indian country in this table, including any area of Indian country located in the larger designation area. The inclusion of any Indian country in the designation area is not a determination that the state has regulatory authority under the Clean Air Act for such Indian country.

²This date is April 9, 2018, unless otherwise noted.

* * * * *

3. In §81.311, the table entitled “Georgia–2010 Sulfur Dioxide NAAQS [Primary]” is amended by removing footnote 3 from the table, the “Designated area” column heading, and the entry “Rest of State” and adding the entry “Floyd County” in alphabetical order to read as follows:

§81.311 Georgia.

* * * * *

Georgia–2010 Sulfur Dioxide NAAQS

[Primary]

Designated area ¹	Designation	
	Date ²	Type
* * *	* *	* *
Floyd County	4/30/2021	Attainment/Unclassifiable.
* * *	* *	* *

¹Includes any Indian country in each county or area, unless otherwise specified. EPA is not determining the boundaries of any area of Indian country in this table, including any area of Indian country located in the larger designation area. The inclusion of any Indian country in the designation area is not a determination that the state has regulatory authority under the Clean Air Act for such Indian country.

²This date is April 9, 2018, unless otherwise noted.

* * * * *

4. In §81.312, the table entitled “Hawaii–2010 Sulfur Dioxide NAAQS [Primary]” is amended by removing footnote 3 from the table and the “Designated area” column heading and adding a the entry “Honolulu County” in alphabetical order to read as follows:

§81.312 Hawaii.

* * * * *

Hawaii–2010 Sulfur Dioxide NAAQS

[Primary]

Designated area ¹	Designation	
	Date ²	Type
* * *	* *	* *
Honolulu County	4/30/2021	Attainment/Unclassifiable.
* * *	* *	* *

¹Includes any Indian country in each county or area, unless otherwise specified. EPA is not determining the boundaries of any area of Indian country in this table, including any area of Indian country located in the larger designation area. The inclusion of any Indian country in the designation area is not a determination that the state has regulatory authority under the Clean Air Act for such Indian country.

²This date is April 9, 2018, unless otherwise noted.

* * * * *

5. Section 81.314 is amended by revising the table entitled “Illinois–2010 Sulfur Dioxide NAAQS [Primary]” to read as follows:

§81.314 Illinois.

* * * * *

Illinois–2010 Sulfur Dioxide NAAQS

[Primary]

Designated area ¹	Designation	
	Date ²	Type
Alton Township, IL	9/12/2016	Nonattainment.
Madison County (part)		

Within Alton Township: Area east of Corporal Belchik Memorial Expressway, south of East Broadway, south of Route 3, and north of Route 143

¹Includes any Indian country in each county or area, unless otherwise specified. EPA is not determining the boundaries of any area of Indian country in this table, including any area of Indian country located in the larger designation area. The inclusion of any Indian country in the designation area is not a determination that the state has regulatory authority under the Clean Air Act for such Indian country.

²This date is April 9, 2018, unless otherwise noted.
