

## Data Enhancements on the LMOP Website!

The U.S. EPA Landfill Methane Outreach Program (LMOP) is excited to announce that we have enhanced our website to offer **new visual representations of landfill and landfill gas (LFG) energy project data** as well as other improvements.

- Our [LMOP Landfill and Project Database](#) page includes new data offerings — a current year **composite Excel file of all landfill and project data fields** from the other files on the site and **historical data files** of the LMOP data posted online annually from 2001 through 2019. We also added a **graphic to display the project status definitions** from the database.
- The [Renewable Natural Gas \(RNG\)](#) page offers improvements to the **RNG project map** so you can explore and export a csv file of RNG projects. The page also features a **new bar chart showing counts of RNG projects from the landfill and agriculture sectors** over time.
- Our [About LMOP](#) page now presents **two charts that provide a historical look at LFG energy projects**.
- We added a **new "Product Supplier" field** for operational projects to the [LMOP National map](#).
- A new pie chart on the [Basic Information about LFG](#) page breaks down **U.S. methane emissions by sector**, separately calling out the emissions from municipal solid waste landfills.
- We reorganized the center section of the [LMOP homepage](#) to link to the **information and resources most often sought by stakeholders**.
- We **streamlined** the [LMOP Accomplishments](#) page and **refreshed the data**.

If you have any questions about these improvements or other ideas for helpful information to include on our website, please reach out to us at [lmop@epa.gov](mailto:lmop@epa.gov).
