Environmental Impact of Buildings

In the US, buildings account for:

- ▶ 39 % of total energy use
- ▶ 12 % of the total water consumption
- ▶ 68 % of total electricity consumption
- ▶ 38 % of the CO2 emissions
- ▶ 60 % of total non-industrial waste generation (C&D)
- ▶ 60 % of all materials (excluding food and fuel)

EPA Strategic Goal and Programs to Promote Sustainable Building Practices

EPA has a fundamental interest in assuring that buildings are healthy places to live, work, and learn; that energy use is dramatically reduced; and that buildings use water, materials, products and land in a sustainable manner.
