

NEW FOUNDING PARTNER

E. I. du Pont de Nemours and Company

With more than 75 years of proven leadership in refrigerant science and technology, DuPont has pioneered much of the science that has made cooling possible. DuPont was the first to identify and commercialize alternative refrigerants for the phase out of CFCs and HCFCs. Today, DuPont markets the broadest range of non-ozone depleting alternatives for stationary air conditioning and refrigeration applications with DuPont™ ISCEON® refrigerants for existing equipment, and DuPont™ Suva® 404A and 507 refrigerants for new equipment. As a GreenChill partner, DuPont is committed to help deliver both environmentally and economically sustainable cooling solutions.
