

The BATTLE on CLIMATE CHANGE:

GLIMPSES FROM THE FRONTS

26th Pacific Islands Environment Conference

Saipan, CNMI

Saipan World Resort

22 – 25 June, 2009

Joseph M. Konno

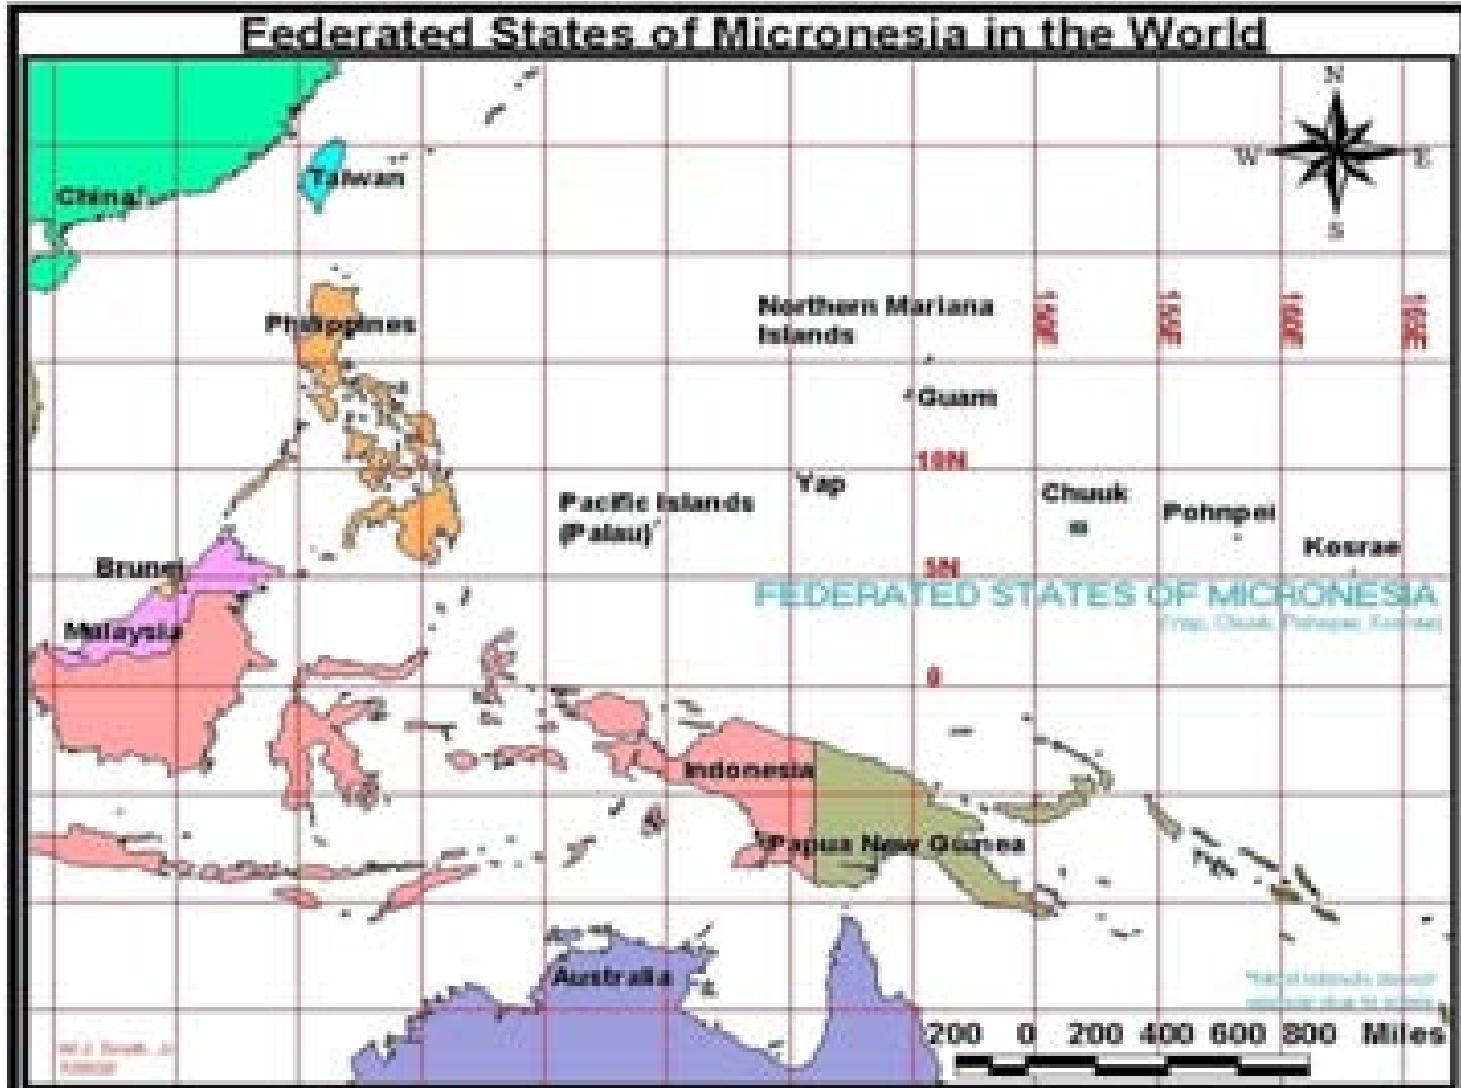

FSM Office of Environment & Emergency Management
Palikir, Pohnpei, FSM

OUTLINE

1. OVERVIEW of FSM
2. The Battle on the Local Front
3. The Battle at the International Front
4. Challenges:
5. Q&A

Federated States of Micronesia

- 607 Islands
- 30 high, 33 atolls
- Total area about 3 million sq. km.
- Total Land Area= 4,840 sq. km.
- Atolls to 791 meters above sea level
- Population (2000) =107,000

Federated States of Micronesia

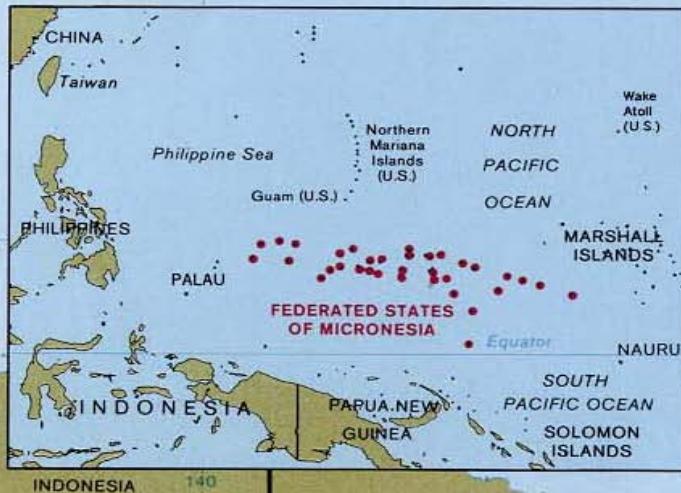

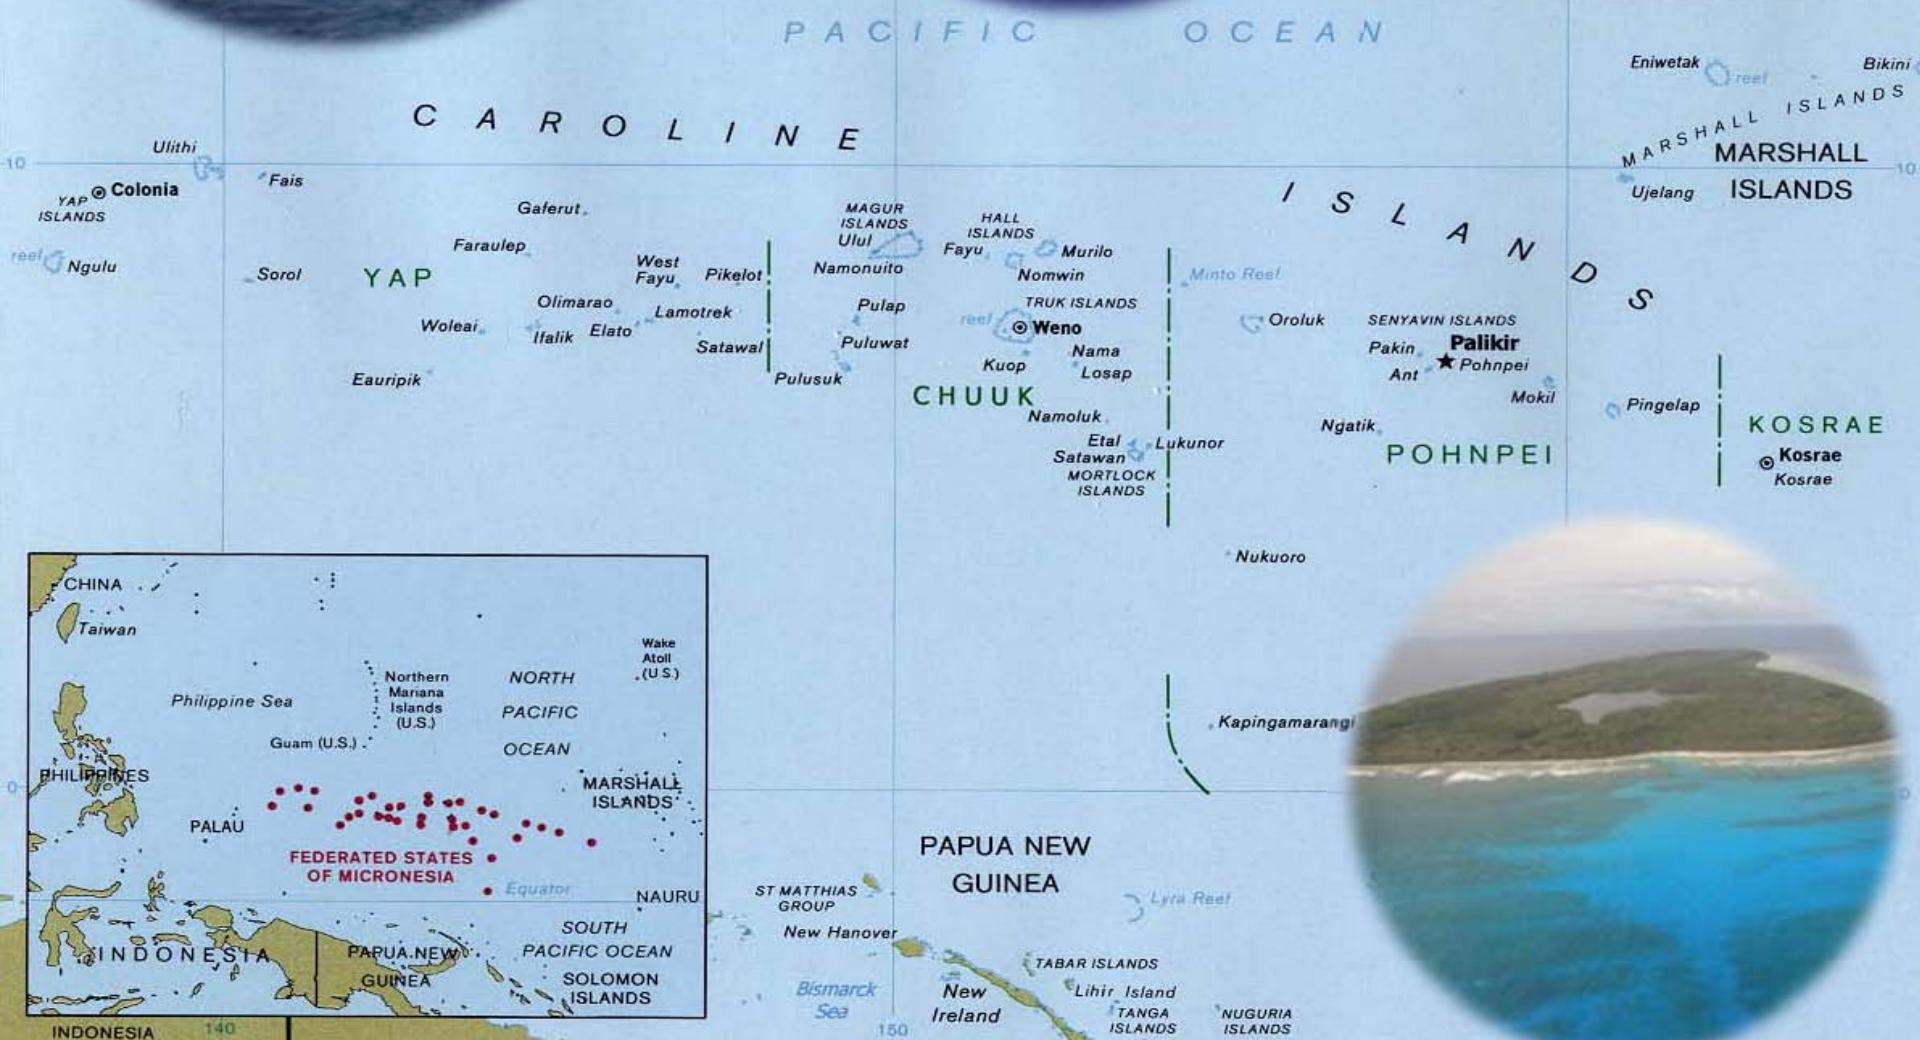

★ National capital

YAP State name

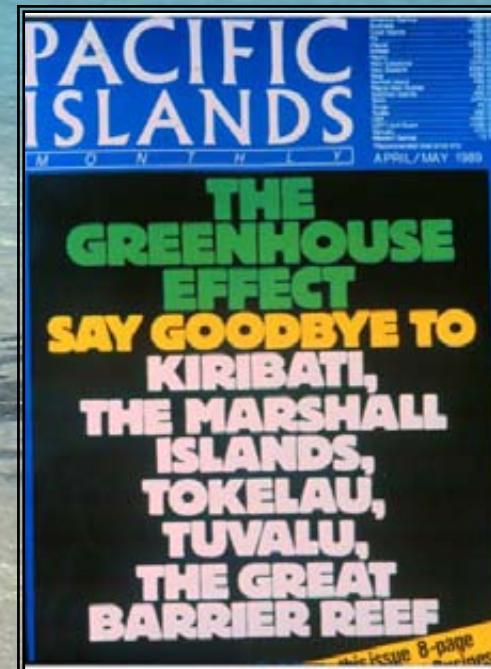

◎ State capital

Mercator Projection

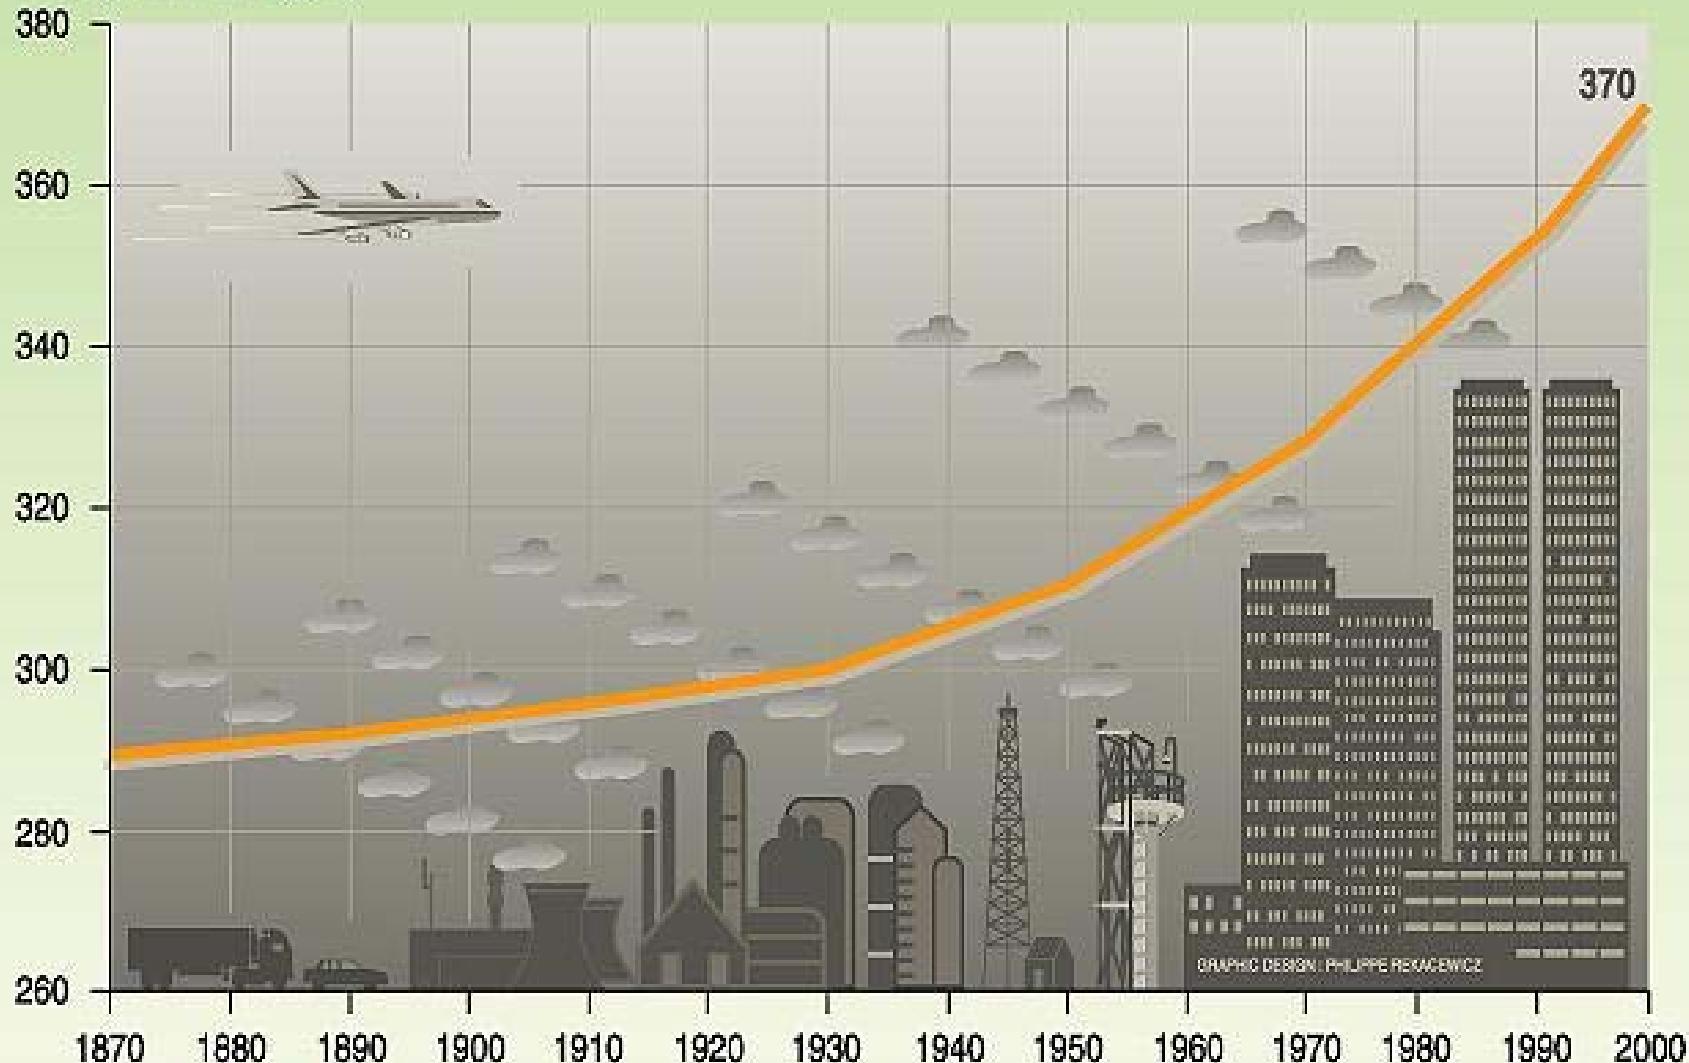

PARADISE, NEXT TO HEAVEN.....

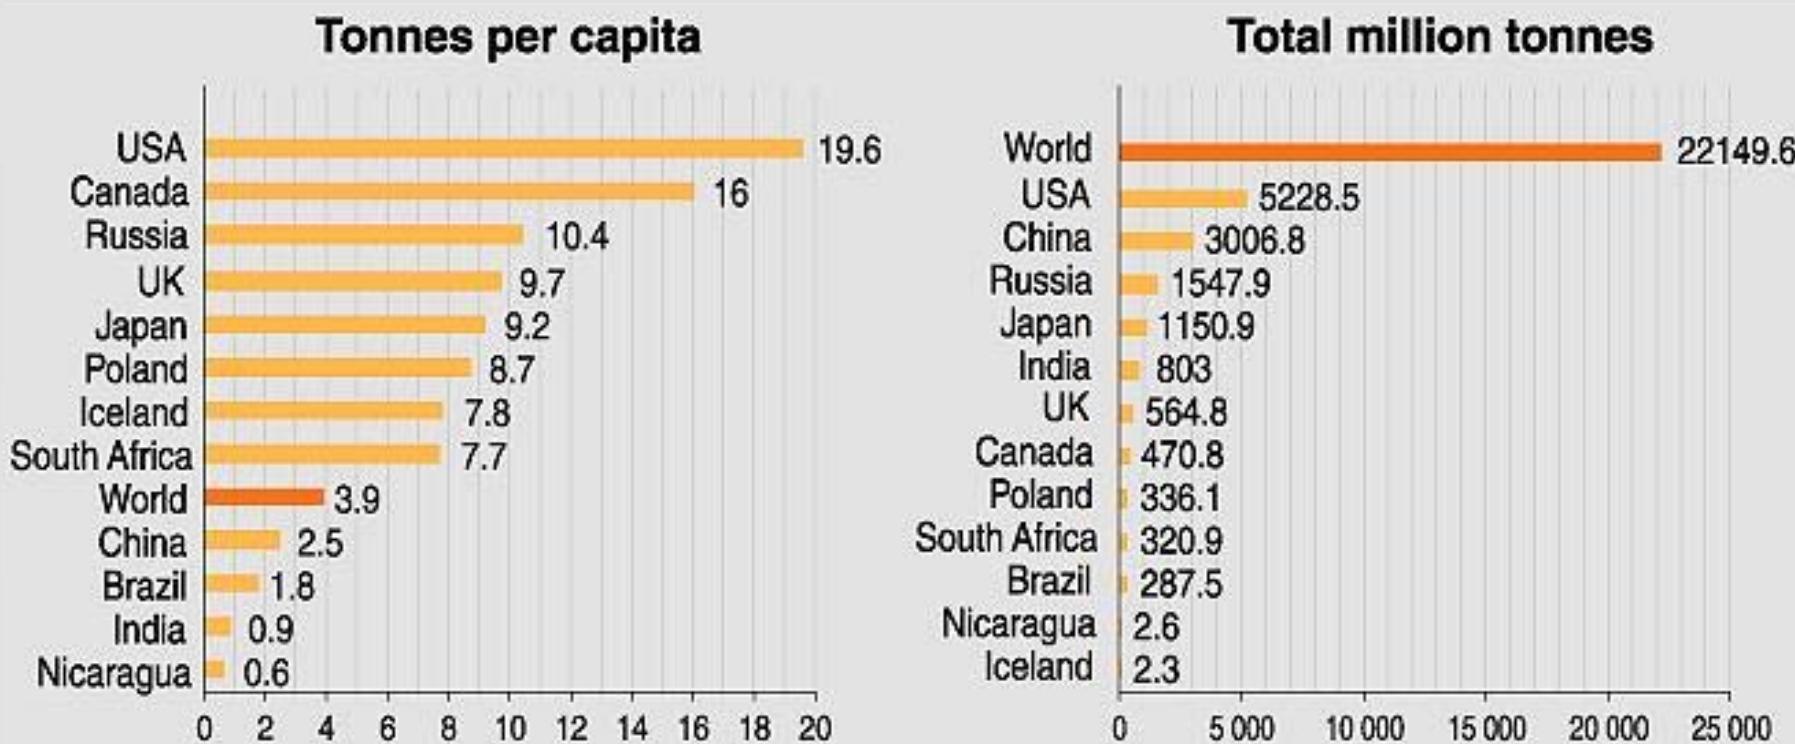

....then why worry?

Global atmospheric concentration of CO₂

Parts per million (ppm)

Emissions of CO₂ - selected countries (1995)

GRAPHIC DESIGN : PHILIPPE REKOCZEWICZ

Projections

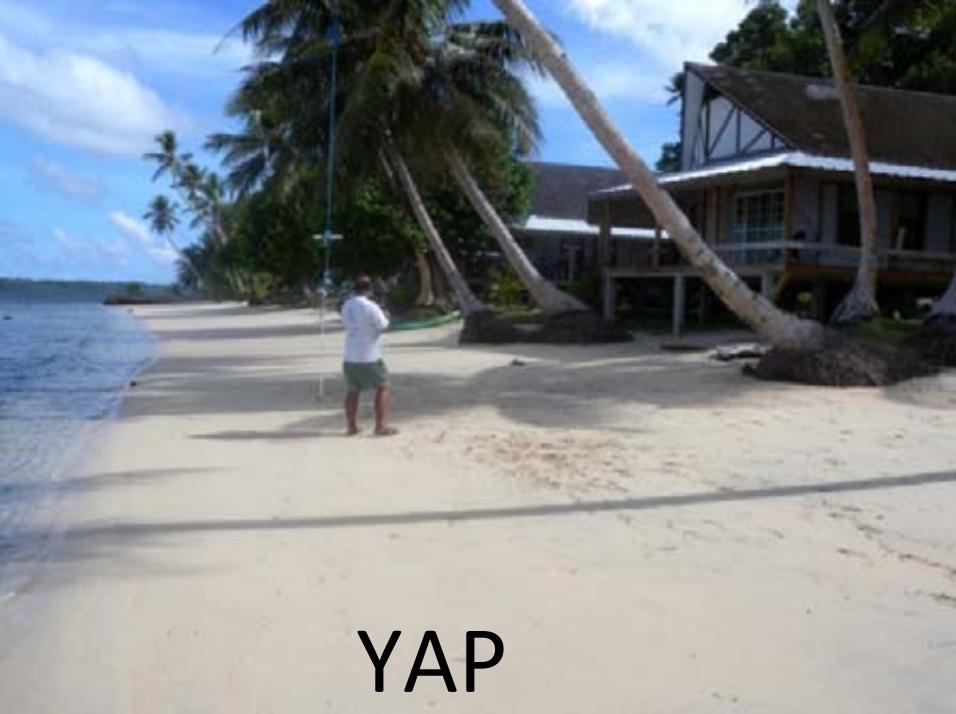

- GHGs will continue to increase
- GHGs already in atmosphere will continue to impact climate system (even if stopped now)
- SLR will continue to rise (IPCC AR4) and later projections (up to 2 meters)
- Extreme events: more frequent/intense
- Rainfall may decrease in yearly total but more intense
- Increase ocean acidification

A photograph showing a large, light-green house with a corrugated metal roof partially submerged in floodwater. The water is turbulent and brownish. In the background, there are palm trees and more houses under construction or partially submerged.

**KOSRAE STATE
FLOODING HOME IN TAFUNSAK**

**KOSRAE STATE
MAIN ROAD FLOODING**

YAP

POHNPEI

YAP

SAMPLE ROTTEN TARO

ETTAL, MORTLOCKS REGION & FANANU, NORTHWEST REGION

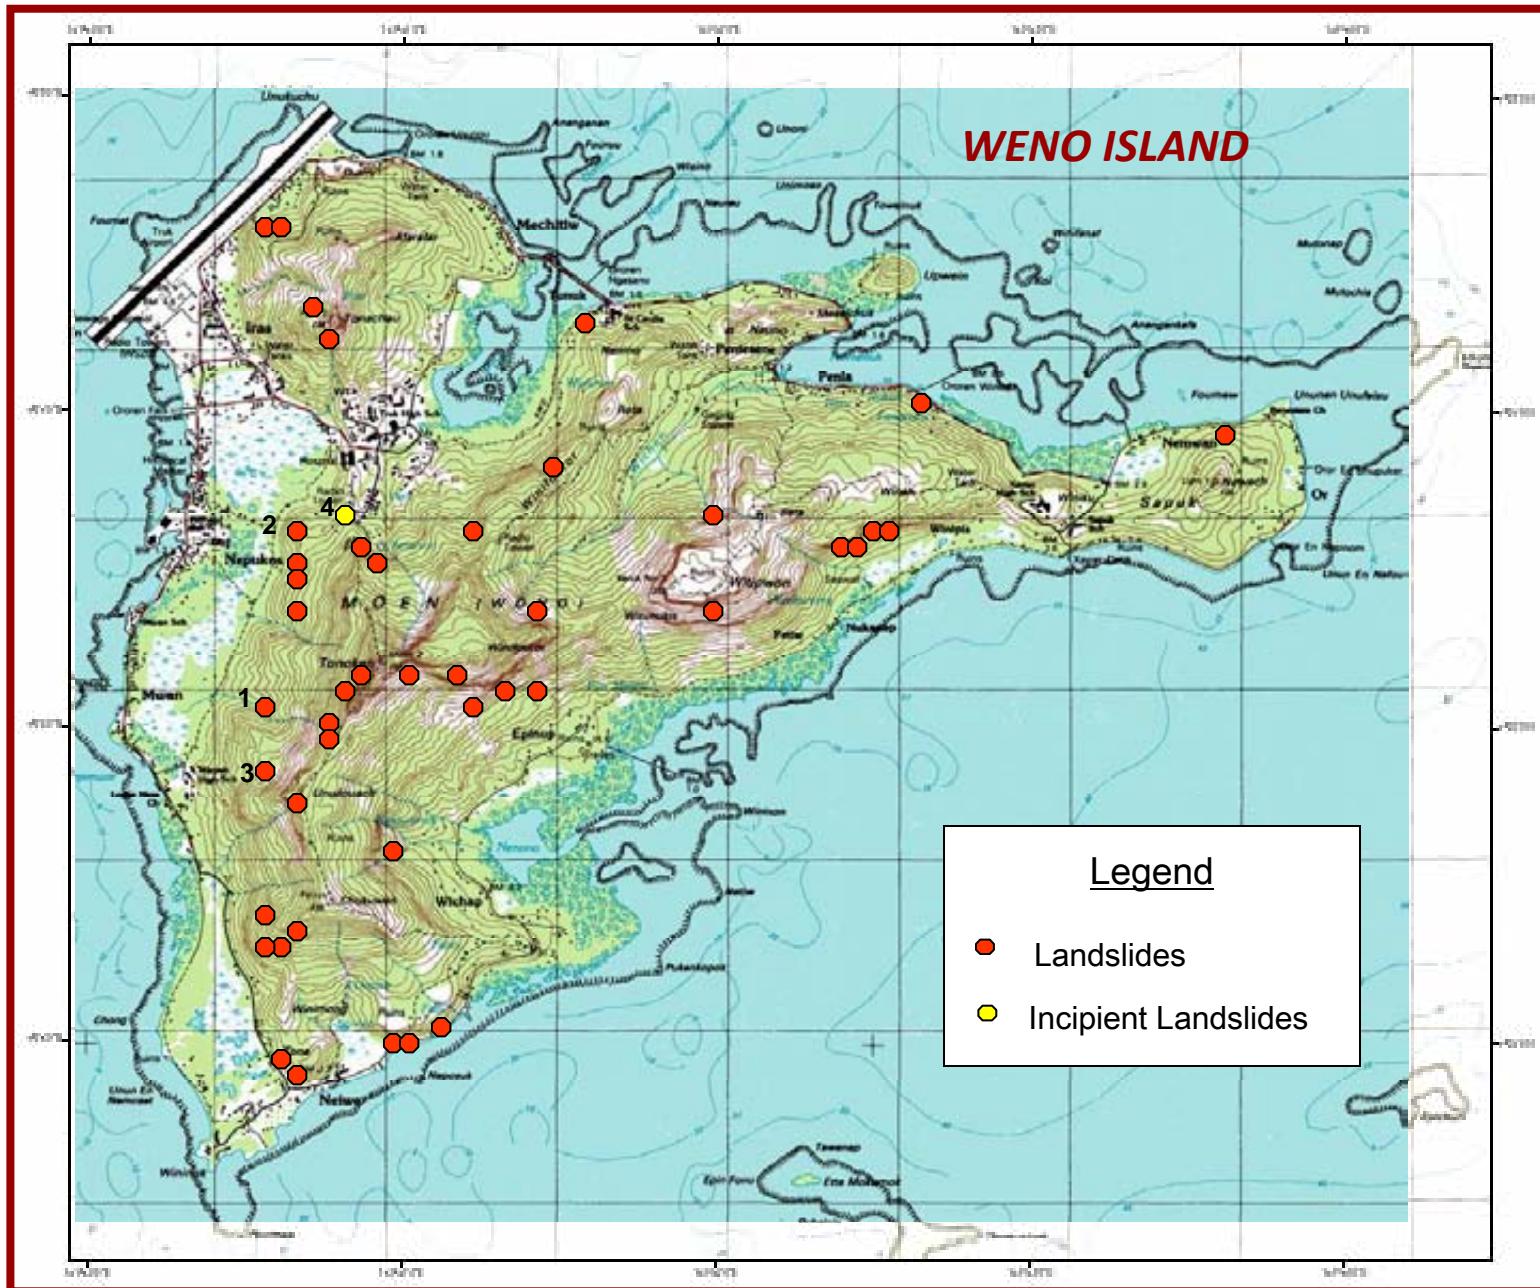

**COASTAL EROSION CAUSING COCONUT TREES TO FALL &
WATER TANK AND HOUSES TO FALL INTO OCEAN**

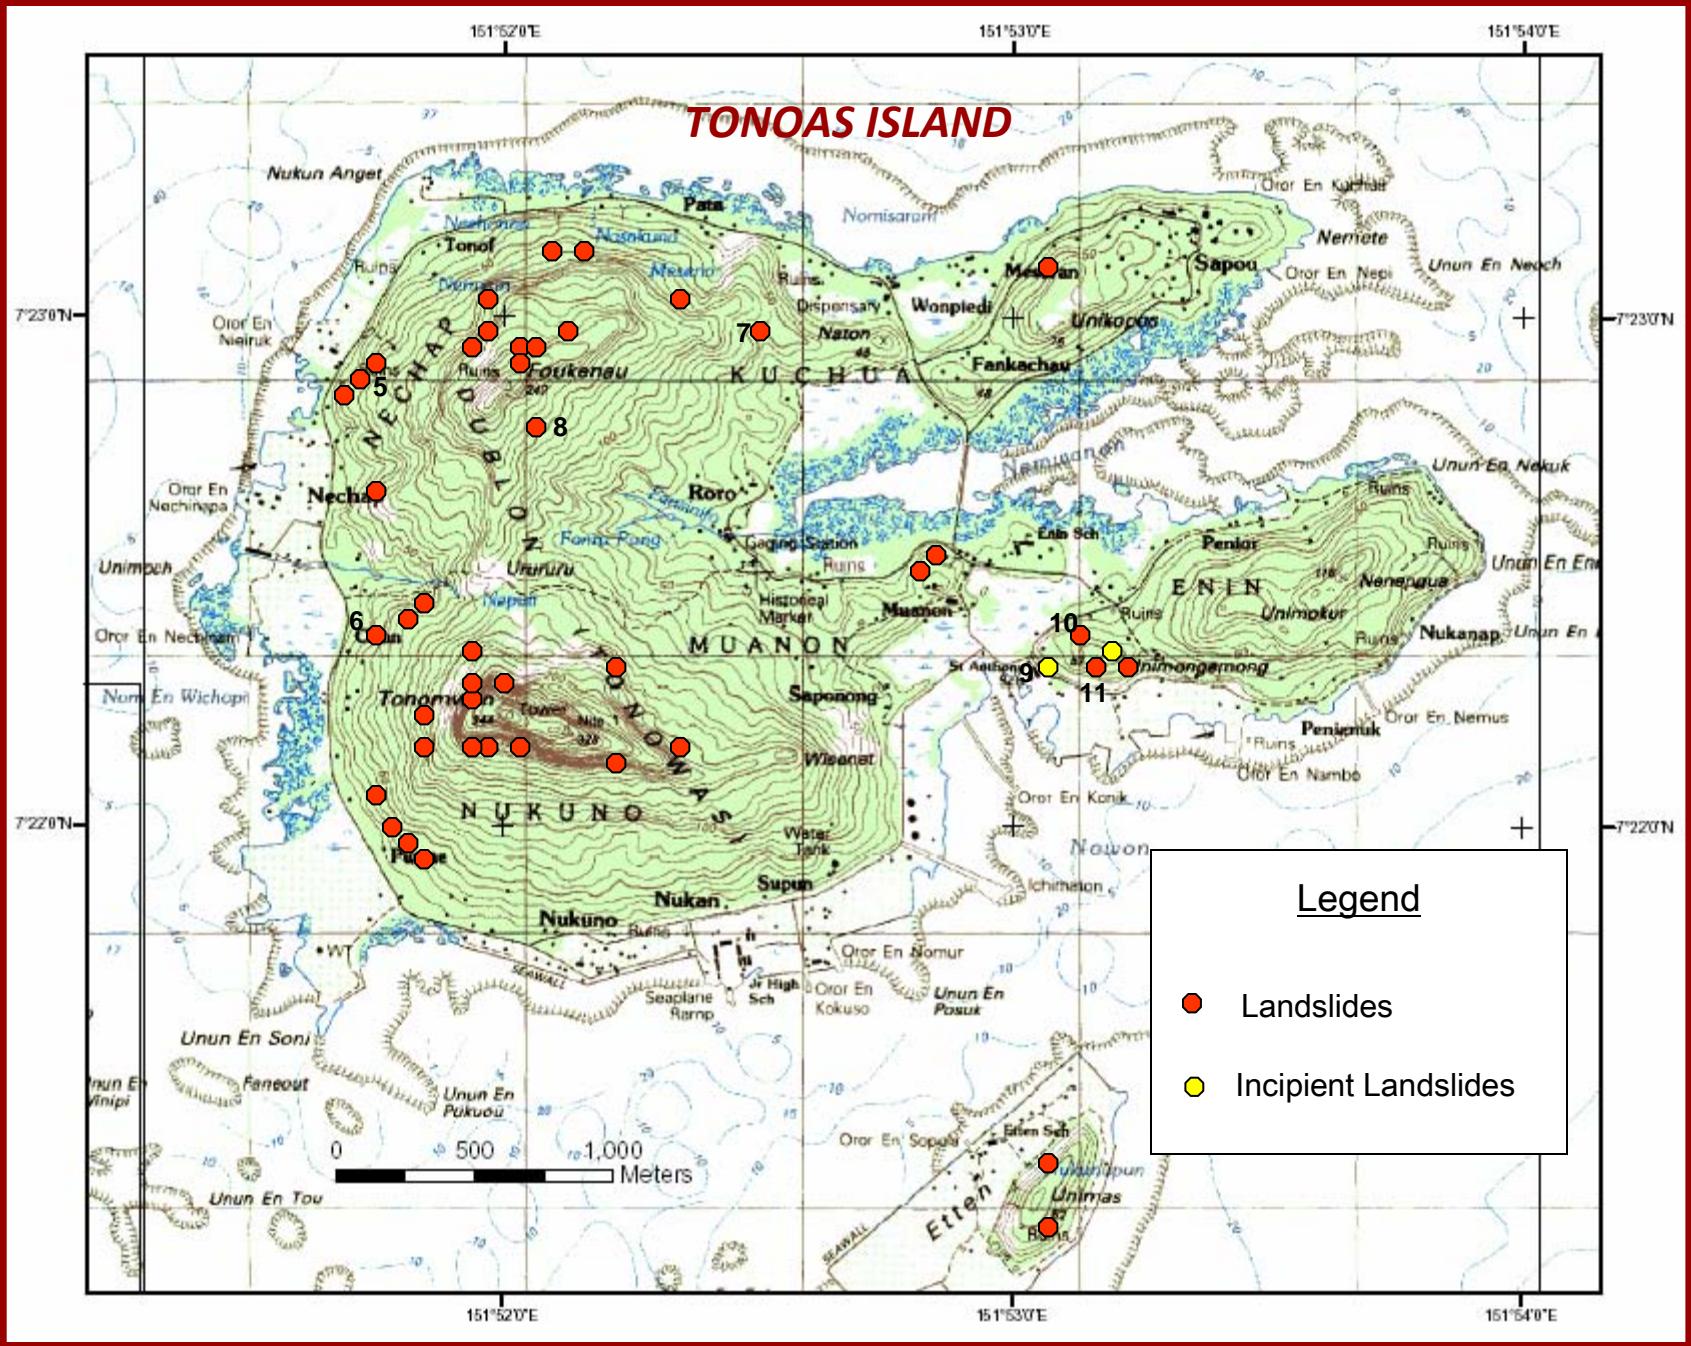

Increased Rainfall Intensity resulted in Landslides in Chuuk & Pohnpei

MWAN LANDSLIDE

International Front

1. Rio UNFCCC (no teeth)
2. Kyoto Kyoto Protocol (too low)
3. Bali Bali Roadmap (post KP)
4. Bonn/others (1-6) Targets & others
5. Copenhagen 45% by 2020, 95% by
2050 (FSM/AOSIS) (350
ppm/1.5 deg. C)
6. Montreal Protocol, CBD and others

UN Framework Convention Climate Change (UNFCCC)

● **OBJECTIVE** (Art. 2): The ultimate objective of this Convention .. is to achieve.. **Stabilization of GHG concentration** in the atmosphere at a level that would **prevent anthropogenic interference** with the climate system. Such a level should be achieved within a timeframe sufficient to **allow ecosystem to adapt** naturally to climate change, to **ensure that food security production is not threatened** and to **enable economic development to proceed in a sustainable manner**.

UNFCCC

- COMMITMENT (Art 4.8): Parties shall give full consideration to what actions are necessary under the Convention, including actions related to funding, insurance, transfer of technology, to meet the specific needs and concerns of developing country Parties arising from the adverse effects of CC especially on:
 - (a) Small island countries;
 - (b) Countries with low-lying coastal areas;
 - (d) Countries with areas prone to natural disasters;
 - (g) Countries with areas of fragile eco-systems....

Addressing CC in MP & Others

1. Targets under CC/post KP will not be enough especially to avoid reaching “tipping points”
2. CC under Montreal Protocol (M & M)
 - a) To accelerate phase-out of Hydrochlorofluorocarbons (HCFCs) (16 b tones of CO₂ e by 2040)
 - b) Collect/destroy banks of ODS
 - c) US EPA 2009 CLIMATE AWARD for Micronesia & Mauritius
 - d) Regulate Hydrofluorocarbons (HFCs) under MP (non ODS ...cover under KP)
 - e) Others: biochar, reduction of black carbon soot, Technology transfer etc
3. CBD: Micronesia Challenge (20/30) by 2020

CHALLENGES.....

1. Acceptance
2. Change behavior
3. Political will & Political Leadership

*Pray hard.....for the heavens that to
provide for us....*

Is turning against us!
