

Hydro Resources, Inc. Request for permitting for Underground Injection Control

Mr. Albright,

Regarding any serious issues of in-situ leach mining especially for uranium, there should definitely be an allowance for a public hearing. Furthermore, personally I am against any/all permitting for uranium in-situ leach mining. This appears to be an Environmental Justice Issue! The Federal Trust Responsibility of the USEPA should supersede any application to destroy the health/environment of indigenous people residing within Federal Trust Land. Thank you.
