

**United States Environmental Protection Agency
Region 8
Air Program
1595 Wynkoop Street
Denver, Colorado 80202**

**AIR POLLUTION CONTROL
TITLE V PERMIT TO OPERATE**

In accordance with the provisions of title V of the Clean Air Act and 40 CFR part 71 and applicable rules and regulations,

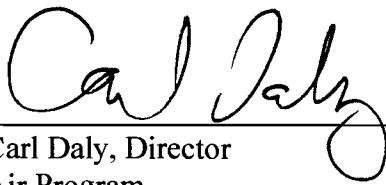

**Red Cedar Gathering Company
Diamondback Compressor Station**

is authorized to operate air emission units and to conduct other air pollutant emitting activities in accordance with the permit conditions listed in this permit.

This source is authorized to operate at the following location:

**Southern Ute Indian Reservation
NE ¼ Section 8, T32N, R9W, La Plata County, Colorado**

Terms not otherwise defined in this permit have the meaning assigned to them in the referenced regulations. All terms and conditions of the permit are enforceable by EPA and citizens under the Clean Air Act.

Carl Daly, Director
Air Program
US EPA Region 8

**AIR POLLUTION CONTROL
TITLE V PERMIT TO OPERATE
Red Cedar Gathering Company
Diamondback Compressor Station**

Permit Number: V-SU-00018-2005.01
Replaces Permit No.: V-SU-0018-05.00

Issue Date: August 16, 2011
Effective Date: August 16, 2011
Expiration Date: April 4, 2014

The permit number cited above should be referenced in future correspondence regarding this facility.

Permit Action History

DATE OF ISSUANCE	TYPE OF ACTION	SECTION NUMBER AND TITLE	DESCRIPTION OF ACTION
January 2001	Initial Permit Issued		Permit #V-SU-0018-00.00 (modified 3 times)
February 2009	1 st Renewal Permit Issued		Permit #V-SU-0018-05.00
August 2011	Minor Modification		Permit #V-SU-00018-2005.01 -Replace unit X-500 with unit X-600

I. Source Information and Emission Unit Identification

I.A. Source Information

Parent Company Name: Red Cedar Gathering Company

Plant Name: Diamondback Compressor Station

Plant Location: NE ¼ Section 8, T32N, R9W
37°02'9.7"N by -107°50'48.3"W

Region: 8

State: Colorado

County: La Plata

Reservation: Southern Ute Indian Reservation

Tribe: Southern Ute Indian Tribe

Responsible Official: President – Chief Operating Officer

SIC Code: 1311

AFS Plant Identification Number: 08-067-00348

Other Clean Air Act Permits: There are no other Federal Clean Air Act (CAA) permits, such as Prevention of Significant Deterioration (PSD) or minor New Source Review (NSR) issued to this facility.

Description of Process:

The Diamondback Compressor Station compresses natural gas from 50 psig up to 300 psig, and then removes water from the gas (dehydration). The facility does not extract natural gas liquids (NGLs) from field gas, nor fractionate mixed NGL to natural gas products.

Air pollutant emissions are primarily from three internal combustion engines which drive the compressors. All engines are Waukesha model L7042GL lean burn engines, fired only on natural gas, site rated at 1,478 brake horsepower (bhp) and exhaust individually to the atmosphere. There are also two natural gas fired glycol dehydrators, three small heaters, and several tanks, which are listed in the part 71 operating permit application as insignificant emitting units. All emitting units are listed in Section I.B of this permit.

The Diamondback Compressor Station and the Sidewinder Compressor Station together constitute a single major source as defined in 40 CFR part 71.2 (Definitions). Part 71 does allow for a group of permits to be issued for a part 71 source. EPA had initially processed separate permits for the Diamondback and Sidewinder facilities. However, in October 2005, Red Cedar requested in an updated application to the original application, that the Diamondback and Sidewinder facilities be regulated under one permit number.

I.B. Source Emission Points

Table 1 - Emission Units
Red Cedar Gathering Company, Diamondback Compressor Station

Emission Unit ID	Description	Control Equipment
C-100 C-200 C-300	1,478 bhp, Waukesha L7042GL Compressor Engines, lean burn, natural gas fired: serial no. 402853 Installed 1/10/2011 serial no. C-13152/1 Installed 5/28/2007 serial no. C-13153/1 Installed 4/3/2008	None
G-001	185 hp, Onan/Cummins GTA8.3-LC-G1 125GGKB Model Generator Set, rich burn, natural gas fired: serial no. 718445 Installed 02/2006	None
X-600	PESCO 18 MMscfd, TEG Natural Gas Dehydrator serial no. unknown Installed 7/1/2011	None
X-700	PESCO 12 MMscfd, TEG Natural Gas Dehydrator serial no. 101653 (absorber) Installed 10/1998	None

Table 2 -- Insignificant Emission Units
Red Cedar Gathering Company, Diamondback Compressor Station

Emission Unit ID	Description
X-600	0.65 MMBtu/hr TEG Reboiler
X-700	0.25 MMBtu/hr TEG Reboiler
H-500	Three (3) Catalytic Heaters, 12,000 Btu/hr each (Inlet slug catcher V-500) (Sidewinder fuel/meter building) (Sidewinder fuel/meter building)
H-501	
H-502	
H-503 H-504	Two (2) Tank Heaters (TK-500, TK-501), 325,000 Btu/hr each
TK-500	Waste Oil Drain Tank, 6,600 gallons
TK-501	Waste Water Tank, 21,000 gallons
TK-502	Lube Oil Storage Tank, 1,600 gallons
TK-503	Glycol Still Vent Tank (X-600), 380 gallons
TK-504	Glycol Still Vent Tank (X-700), 280 gallons
TK-505	TEG Storage Tank, 1,000 gallons
TK-506	Waste Oil Tank; 170 gallon
TK-508 TK-509	Two (2) Engine Coolant Tanks, 500 gallons each
TK-509S	Waste Water Tank, 21,000 gallons (Sidewinder)
TK-514	Generator Oil Makeup Tank, 55 gallons

II. Facility-Wide Requirements

Conditions in this section of the permit apply to all emissions units located at the facility, including any units not specifically listed in Table 1 and Table 2 of Section I.B.

[40 CFR 71.6(a)(1)]

II.A. General Recordkeeping Requirements

The permittee shall comply with the following generally applicable recordkeeping requirements:

1. If the permittee determines that his or her stationary source that emits (or has the potential to emit, without federally recognized controls) one or more hazardous air pollutants is not subject to a relevant standard or other requirement established under 40 CFR part 63, the permittee shall keep a record of the applicability determination at the corporate headquarters in Durango, Colorado, for a period of five (5) years after the determination, or until the source changes its operations to become an affected source, whichever comes first. The record of the applicability determination shall include an analysis (or other information) that demonstrates why the permittee believes the source is unaffected (e.g., because the source is an area source).
2. Records shall be kept of off permit changes, as required by Section III.Q. of this permit.
3. The permittee is the owner or operator of a glycol dehydration unit that is exempt from the control requirements under §63.764. The permittee shall retain each determination used to demonstrate that actual flowrate of natural gas throughput is less than 85,000 scm/day (3,000,000 scf/day) or the actual average benzene emissions are below 1 tpy.

[40 CFR 63.10(b)(3) and 63.10(f)]

[40 CFR 63.764(e)(1), 63.772(b)(2) and 63.774(d)(1)]

II.B. General Reporting Requirements [40 CFR 71.6(a)(3)(iii)]

1. The permittee shall promptly report to the EPA Regional Office deviations from permit requirements, including those attributable to upset conditions as defined in this permit, the probable cause of such deviations, and any corrective actions or preventive measures taken. “Prompt” is defined as follows:
 - a. Any definition of “prompt” or a specific timeframe for reporting deviations provided in an underlying applicable requirement as identified in this permit;
 - b. Where the underlying applicable requirement fails to address the time frame for reporting deviations, reports of deviations will be submitted based on the following schedule:

- i. For emissions of a hazardous air pollutant or a toxic air pollutant (as identified in the applicable regulation) that continue for more than an hour in excess of permit requirements, the report must be made within 24 hours of the occurrence.
 - ii. For emissions of any regulated air pollutant, excluding a hazardous air pollutant or a toxic air pollutant that continues for more than two (2) hours in excess of permit requirements, the report must be made within 48 hours.
 - iii. For all other deviations from permit requirements, the report shall be submitted with the semi-annual monitoring report.
2. If any of the conditions in Section II.B.1.(b)(i) or (ii) are met, the source must notify EPA by telephone (1-800-227-8917) or facsimile (303-312-6064) based on the timetables listed above. *[Notification by telephone or fax must specify that this notification is a deviation report for a part 71 permit.]* A written notice, certified consistent with Section III.E. of this permit must be submitted within 10 working days of the occurrence. All deviations reported under this section must also be identified in the 6-month report required under this permit.

[Explanatory note: To help part 71 permittees meet reporting responsibilities, EPA has developed a form "PDR" for prompt deviation reporting. The form may be found on EPA website at: <http://www.epa.gov/air/oaqps/permits/p71forms.html>]

3. "Deviation" means any situation in which an emissions unit fails to meet a permit term or condition. A deviation is not always a violation. A deviation can be determined by observation or through review of data obtained from any testing, monitoring, or recordkeeping established in accordance with §71.6(a)(3)(i) and (a)(3)(ii). For a situation lasting more than 24 hours which constitutes a deviation, each 24 hour period is considered a separate deviation. Included in the meaning of deviation are any of the following:
 - a. A situation where emissions exceed an emission limitation or standard;
 - b. A situation where process or emissions control device parameter values indicate that an emission limitation or standard has not been met; or
 - c. A situation in which observations or data collected demonstrates noncompliance with an emission limitation or standard or any work practice or operating condition required by the permit.

II.C. Permit Shield [40 CFR 71.6(f)(3)]

Nothing in this permit shall alter or affect the following:

1. The liability of a permittee for any violation of applicable requirements prior to or at the time of permit issuance;
2. The ability of the EPA to obtain information under section 114 of the Clean Air Act; or

3. The provisions of section 303 of the Clean Air Act (emergency orders), including the authority of the Administrator under that section.

II.D. Alternative Operating Scenarios [40 CFR 71.6(a)(9) and 40 CFR 71.6(a)(3)(ii)]

Natural Gas-Fired Engine/Generator Replacement/Overhaul

1. Replacement of a permitted natural gas-fired engine or generator with an engine or generator of the same make, model, horsepower rating, and configured to operate in the same manner as the engine or generator being replaced, and which satisfies all of the provisions for off permit changes (Section III.Q. of this permit), including the provisions specific to engine or generator replacement, shall be considered an allowed alternative operating scenario under this permit.
2. Any emission limits, requirements, or provisions that apply to natural gas-fired engines or generators that are replaced under this alternative operating scenarios section shall also apply to the replacement engines or generators.
3. Replacement of an existing permitted engine or generator with an engine or generator not subject to 40 CFR part 60, subpart JJJJ with an engine or generator subject to 40 CFR part 60, subpart JJJJ is not allowed under this alternative operating scenario.
4. Replacement of an existing permitted natural gas-fired engine or generator not subject to 40 CFR part 63, subpart ZZZZ with an engine or generator subject to 40 CFR part 63, subpart ZZZZ is not allowed under this alternative operating scenario.

[Explanatory note: This section was included to allow for off permit replacement of natural gas-fired engines or generators that may have existing federally enforceable limits. For replacement natural gas-fired engines or generators which trigger new applicable requirements (i.e., NSPS, NESHAP, etc.), the minor permit modification process (Section III.I of this permit) shall be utilized to maintain the permitted emission limits of the replaced engine or generator and incorporate the new applicable requirements.]

III. Part 71 Administrative Requirements

III.A. Annual Fee Payment [40 CFR 71.6(a)(7) and 40 CFR 71.9]

1. The permittee shall pay an annual permit fee in accordance with the procedures outlined below.
[40 CFR 71.9(a)]
2. The permittee shall pay the annual permit fee each year no later than April 1st. The fee shall cover the previous calendar year.
[40 CFR 71.9(h)]
3. The fee payment shall be in United States currency and shall be paid by money order, bank draft, certified check, corporate check, or electronic funds transfer payable to the order of the U.S. Environmental Protection Agency.
[40 CFR 71.9(k)(1)]
4. The permittee shall send fee payment and a completed fee filing form to:

For regular U.S. Postal Service mail

U.S. Environmental Protection Agency
FOIA and Miscellaneous Payments
Cincinnati Finance Center
P.O. Box 979078
St. Louis, MO 63197-9000

For non-U.S. Postal Service Express mail
(FedEx, Airborne, DHL, and UPS)

U.S. Bank
Government Lockbox 979078
U.S. EPA FOIA & Misc. Payments
1005 Convention Plaza
SL-MO-C2-GL
St. Louis, MO 63101

[40 CFR 71.9(k)(2)]

5. The permittee shall send an updated fee calculation worksheet form and a photocopy of each fee payment check (or other confirmation of actual fee paid) submitted annually by the same deadline as required for fee payment to the address listed in Section III.E. of this permit.

[40 CFR 71.9(h)(1)]

[Explanatory note: The fee filing form “FF” and the fee calculation worksheet form “FEE” may be found on EPA website at: <http://www.epa.gov/air/oaqps/permits/p71forms.html>]

6. Basis for calculating annual fee:
 - a. The annual emissions fee shall be calculated by multiplying the total tons of actual emissions of all “regulated pollutants (for fee calculation)” emitted from the source by the presumptive emissions fee (in dollars/ton) in effect at the time of calculation.

[40 CFR 71.9(c)(1)]

- i. “Actual emissions” means the actual rate of emissions in tpy of any regulated pollutant (for fee calculation) emitted from a part 71 source over the preceding calendar year. Actual emissions shall be calculated using each emissions unit’s actual operating hours, production rates, in-place control equipment, and types of materials processed, stored, or combusted during the preceding calendar year.

[40 CFR 71.9(c)(6)]

- ii. Actual emissions shall be computed using methods required by the permit for determining compliance, such as monitoring or source testing data.

[40 CFR 71.9(h)(3)]

- iii. If actual emissions cannot be determined using the compliance methods in the permit, the permittee shall use other federally recognized procedures.

[40 CFR 71.9(e)(2)]

[Explanatory note: The presumptive fee amount is revised each calendar year to account for inflation, and it is available from EPA prior to the start of each calendar year.]

- b. The permittee shall exclude the following emissions from the calculation of fees:

- i. The amount of actual emissions of each regulated pollutant (for fee calculation) that the source emits in excess of 4,000 tons per year;

[40 CFR 71.9(c)(5)(i)]

- ii. Actual emissions of any regulated pollutant (for fee calculation) already included in the fee calculation; and

[40 CFR 71.9(c)(5)(ii)]

- iii. The quantity of actual emissions (for fee calculation) of insignificant activities [defined in §71.5(c)(11)(i)] or of insignificant emissions levels from emissions units identified in the permittee’s application pursuant to §71.5(c)(11)(ii).

[40 CFR 71.9(c)(5)(iii)]

- 7. Fee calculation worksheets shall be certified as to truth, accuracy, and completeness by a responsible official.

[40 CFR 71.9(h)(2)]

[Explanatory note: The fee calculation worksheet form already incorporates a section to help you meet this responsibility.]

8. The permittee shall retain fee calculation worksheets and other emissions-related data used to determine fee payment for five (5) years following submittal of fee payment.
[Emission-related data include, for example, emissions-related forms provided by EPA and used by the permittee for fee calculation purposes, emissions-related spreadsheets, and emissions-related data, such as records of emissions monitoring data and related support information required to be kept in accordance with §71.6(a)(3)(ii).]
[40 CFR 71.9(i)]
9. Failure of the permittee to pay fees in a timely manner shall subject the permittee to assessment of penalties and interest in accordance with §71.9(l).
[40 CFR 71.9(l)]
10. When notified by EPA of underpayment of fees, the permittee shall remit full payment within 30 days of receipt of notification.
[40 CFR 71.9(j)(2)]
11. A permittee who thinks an EPA assessed fee is in error and who wishes to challenge such fee, shall provide a written explanation of the alleged error to EPA along with full payment of the EPA assessed fee.
[40 CFR 71.9(j)(3)]

III.B. Annual Emissions Inventory [40 CFR 71.9(h)(1)and (2)]

The permittee shall submit an annual emissions report of its actual emissions for both criteria pollutants and regulated HAPs for this facility for the preceding calendar year for fee assessment purposes. The annual emissions report shall be certified by a responsible official and shall be submitted each year to EPA by April 1st. The annual emissions report shall be submitted to EPA at the address listed in Section III.E. of this permit.

[Explanatory note: An annual emissions report, required at the same time as the fee calculation worksheet by §71.9(h), has been incorporated into the fee calculation worksheet form as a convenience.]

III.C. Compliance Requirements

1. Compliance with the Permit
 - a. The permittee must comply with all conditions of this part 71 permit. Any permit noncompliance constitutes a violation of the Clean Air Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.
[40 CFR 71.6(a)(6)(i)]

- b. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
[40 CFR 71.6(a)(6)(ii)]
- c. For applicable requirements with which the source is in compliance, the source will continue to comply with such requirements.
[40 CFR 71.5(c)(8)(iii)(A)]
- d. For applicable requirements that will become effective during the permit term, the source shall meet such requirements on a timely basis.
[40 CFR 71.5(c)(8)(iii)(B)]
- e. For the purpose of submitting compliance certifications in accordance with Section III.C.3. of this permit, or establishing whether or not a person has violated or is in violation of any requirement of this permit, nothing shall preclude the use, including the exclusive use, of any credible evidence or information, relevant to whether a source would have been in compliance with applicable requirements if the appropriate performance or compliance test or procedure had been performed.

[Section 113(a) and 113(e)(1) of the Act, 40 CFR 51.212, 52.12, 52.33, 60.11(g), and 61.12]

2. Compliance Schedule

- a. For applicable requirements with which the source is in compliance, the source will continue to comply with such requirements.
[40 CFR 71.5(c)(8)(iii)(A)]
- b. For applicable requirements that will become effective during the permit term, the source shall meet such requirements on a timely basis.
[40 CFR 71.5(c)(8)(iii)(B)]

3. Compliance Certifications

- a. The permittee shall submit to EPA a certification of compliance with permit terms and conditions, including emission limitations, standards, or work practices annually by April 1st, and shall cover the 12 month period ending on February 28th of the year the certification of compliance is due.

[Explanatory note: To help part 71 permittees meet reporting responsibilities, EPA has developed a reporting form for annual compliance certifications. The form may be found on EPA website at: <http://www.epa.gov/air/oaqps/permits/p71forms.html>]

- b. The compliance certification shall be certified as to truth, accuracy, and completeness by a responsible official consistent with §71.5(d).

- c. The certification shall include the following:
- i. Identification of each permit term or condition that is the basis of the certification;
 - ii. The identification of the method(s) or other means used for determining the compliance status of each term and condition during the certification period, and whether such methods or other means provide continuous or intermittent data. Such methods and other means shall include, at a minimum, the methods and means required in this permit. If necessary, the permittee also shall identify any other material information that must be included in the certification to comply with section 113(c)(2) of the CAA, which prohibits knowingly making a false certification or omitting material information;
 - iii. The status of compliance with each term and condition of the permit for the period covered by the certification based on the method or means designated in Section III.C.2.c.ii. above. The certification shall identify each deviation and take it into account in the compliance certification;
 - iv. Such other facts as the EPA may require to determine the compliance status of the source; and
 - v. Whether compliance with each permit term was continuous or intermittent.

[40 CFR 71.6(c)(5)(iii)]

III.D. Duty to Provide and Supplement Information

[40 CFR 71.6(a)(6)(v), 71.5(a)(3), and 71.5(b)]

1. The permittee shall furnish to EPA, within a reasonable time, any information that EPA may request in writing to determine whether cause exists for modifying, revoking, and reissuing, or terminating the permit, or to determine compliance with the permit. Upon request, the permittee shall also furnish to the EPA copies of records that are required to be kept pursuant to the terms of the permit, including information claimed to be confidential. Information claimed to be confidential must be accompanied by a claim of confidentiality according to the provisions of 40 CFR part 2, subpart B.

[40 CFR 71.6(a)(6)(v) and 40 CFR 71.5(a)(3)]

2. The permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information. In addition, a permittee shall provide additional information as necessary to address any requirements that become applicable after the date a complete application is filed, but prior to release of a draft permit.

[40 CFR 71.5(b)]

III.E. Submissions [40 CFR 71.5(d), 71.6(c)(1) and 71.9(h)(2)]

1. Any document (application form, report, compliance certification, etc.) required to be submitted under this permit shall be certified by a responsible official as to truth, accuracy, and completeness. Such certifications shall state that based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

[Explanatory note: EPA has developed a reporting form “CTAC” for certifying truth, accuracy and completeness of part 71 submissions. The form may be found on EPA website at: <http://www.epa.gov/air/oaqps/permits/p71forms.html>]

2. Any documents required to be submitted under this permit, including reports, test data, monitoring data, notifications, compliance certifications, fee calculation worksheets, and applications for renewals and permit modifications shall be submitted to:

Part 71 Permit Contact
Air Program, 8P-AR
U.S. Environmental Protection Agency,
1595 Wynkoop Street
Denver, Colorado 80202

III.F. Severability Clause [40 CFR 71.6(a)(5)]

The provisions of this permit are severable, and in the event of any challenge to any portion of this permit, or if any portion is held invalid, the remaining permit conditions shall remain valid and in force.

III.G. Permit Actions [40 CFR 71.6(a)(6)(iii)]

This permit may be modified, revoked, reopened, and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.

III.H. Administrative Permit Amendments [40 CFR 71.7(d)]

1. The permittee may request the use of administrative permit amendment procedures for a permit revision that:
 - a. Corrects typographical errors;
 - b. Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;
 - c. Requires more frequent monitoring or reporting by the permittee;

- d. Allows for a change in ownership or operational control of a source where the EPA determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the EPA;
- e. Incorporates into the part 71 permit the requirements from preconstruction review permits authorized under an EPA-approved program, provided that such a program meets procedural requirements substantially equivalent to the requirements of §§71.7 and 71.8 that would be applicable to the change if it were subject to review as a permit modification, and compliance requirements substantially equivalent to those contained in §71.6; or
- f. Incorporates any other type of change which EPA has determined to be similar to those listed above in Sections III.H.1.a. through e.

[Note to permittee: If Sections III.H.1.a. through e. above do not apply, please contact EPA for a determination of similarity prior to submitting your request for an administrative permit amendment under this provision.]

III.I. Minor Permit Modifications [40 CFR 71.7(e)(1)]

- 1. The permittee may request the use of minor permit modification procedures only for those modifications that:
 - a. Do not violate any applicable requirement;
 - b. Do not involve significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit;
 - c. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;
 - d. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and conditions include:
 - i. A federally enforceable emissions cap assumed to avoid classification as a modification under any provision of title I; and
 - ii. An alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5) of the Clean Air Act;
 - e. Are not modifications under any provision of title I of the Clean Air Act; and

- f. Are not required to be processed as a significant modification.

[40 CFR 71.7(e)(1)(i)(A)]

- 2. Notwithstanding the list of changes ineligible for minor permit modification procedures in Section III.I.1. above, minor permit modification procedures may be used for permit modifications involving the use of economic incentives, marketable permits, emissions trading, and other similar approaches, to the extent that such minor permit modification procedures are explicitly provided for in an applicable implementation plan or in applicable requirements promulgated by EPA.

[40 CFR 71.7(e)(1)(i)(B)]

- 3. An application requesting the use of minor permit modification procedures shall meet the requirements of §71.5(c) and shall include the following:

- a. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
- b. The source's suggested draft permit;
- c. Certification by a responsible official, consistent with §71.5(d), that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used; and
- d. Completed forms for the permitting authority to use to notify affected States as required under §71.8.

[40 CFR 71.7(e)(1)(ii)]

- 4. The source may make the change proposed in its minor permit modification application immediately after it files such application. After the source makes the change allowed by the preceding sentence, and until the permitting authority takes any of the actions authorized by §71.7(e)(1)(iv)(A) through (C), the source must comply with both the applicable requirements governing the change and the proposed permit terms and conditions. During this time period, the source need not comply with the existing permit terms and conditions it seeks to modify. However, if the source fails to comply with its proposed permit terms and conditions during this time period, the existing permit terms and conditions it seeks to modify may be enforced against it.

[40 CFR 71.7(e)(1)(v)]

- 5. The permit shield under §71.6(f) may not extend to minor permit modifications.

[40 CFR 71.7(e)(1)(vi)]

III.J. Group Processing of Minor Permit Modifications [40 CFR 71.7(e)(2)]

- 1. Group processing of modifications by EPA may be used only for those permit modifications:

- a. That meet the criteria for minor permit modification procedures under Section III.I.1. of this permit; and
- b. That collectively are below the threshold level of 10 percent of the emissions allowed by the permit for the emissions unit for which the change is requested, 20 percent of the applicable definition of major source in §71.2, or 5 tons per year, whichever is least.

[40 CFR 71.7(e)(2)(i)]

- 2. An application requesting the use of group processing procedures shall be submitted to EPA, shall meet the requirements of §71.5(c), and shall include the following:

- a. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
- b. The source's suggested draft permit;
- c. Certification by a responsible official, consistent with §71.5(d), that the proposed modification meets the criteria for use of group processing procedures and a request that such procedures be used;
- d. A list of the source's other pending applications awaiting group processing, and a determination of whether the requested modification, aggregated with these other applications, equals or exceeds the threshold set under Section III.J.1.b. above; and
- e. Completed forms for the permitting authority to use to notify affected States as required under §71.8.

[40 CFR 71.7(e)(2)(ii)]

- 3. The source may make the change proposed in its minor permit modification application immediately after it files such application. After the source makes the change allowed by the preceding sentence, and until the permitting authority takes any of the actions authorized by §71.7(e)(1)(iv)(A) through (C), the source must comply with both the applicable requirements governing the change and the proposed permit terms and conditions. During this time period, the source need not comply with the existing permit terms and conditions it seeks to modify. However, if the source fails to comply with its proposed permit terms and conditions during this time period, the existing permit terms and conditions it seeks to modify may be enforced against it.

[40 CFR 71.7(e)(2)(v)]

- 4. The permit shield under §71.6(f) may not extend to group processing of minor permit modifications.

[40 CFR 71.7(e)(2)(vi)]

III.K. Significant Permit Modifications [40 CFR 71.7(e)(3)]

1. The permittee must request the use of significant permit modification procedures for those modifications that:
 - a. Do not qualify as minor permit modifications or as administrative amendments;
 - b. Are significant changes in existing monitoring permit terms or conditions; or
 - c. Are relaxations of reporting or recordkeeping permit terms or conditions.

[40 CFR 71.7(e)(3)(i)]

2. Nothing herein shall be construed to preclude the permittee from making changes consistent with part 71 that would render existing permit compliance terms and conditions irrelevant.

[40 CFR 71.7(e)(3)(i)]

3. Permittees must meet all requirements of part 71 for applications, public participation, and review by affected states and tribes for significant permit modifications. For the application to be determined complete, the permittee must supply all information that is required by §71.5(c) for permit issuance and renewal, but only that information that is related to the proposed change.

[40 CFR 71.7(e)(3)(ii), 71.8(d), and 71.5(a)(2)]

III.L. Reopening for Cause [40 CFR 71.7(f)]

1. The permit may be reopened and revised prior to expiration under any of the following circumstances:
 - a. Additional applicable requirements under the Act become applicable to a major part 71 source with a remaining permit term of three (3) or more years. Such a reopening shall be completed not later than eighteen (18) months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions have been extended pursuant to §71.7 (c)(3);
 - b. Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit;
 - c. EPA determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit; or

- d. EPA determines that the permit must be revised or revoked to assure compliance with the applicable requirements.

III.M. Property Rights [40 CFR 71.6(a)(6)(iv)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

III.N. Inspection and Entry [40 CFR 71.6(c)(2)]

Upon presentation of credentials and other documents as may be required by law, the permittee shall allow EPA or an authorized representative to perform the following:

1. Enter upon the permittee's premises where a part 71 source is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
2. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;
3. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
4. As authorized by the CAA, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit or applicable requirements.

III.O. Emergency Provisions [40 CFR 71.6(g)]

1. In addition to any emergency or upset provision contained in any applicable requirement, the permittee may seek to establish that noncompliance with a technology-based emission limitation under this permit was due to an emergency. To do so, the permittee shall demonstrate the affirmative defense of emergency through properly signed, contemporaneous operating logs, or other relevant evidence that:
 - a. An emergency occurred and that the permittee can identify the cause(s) of the emergency;
 - b. The permitted facility was at the time being properly operated;
 - c. During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards, or other requirements in this permit; and
 - d. The permittee submitted notice of the emergency to EPA within two (2) working days of the time when emission limitations were exceeded due to the emergency. This notice must contain a description of the emergency, any steps taken to

mitigate emissions, and corrective actions taken. This notice fulfills the requirements for prompt notification of deviations.

2. In any enforcement proceeding the permittee attempting to establish the occurrence of an emergency has the burden of proof.
3. An “emergency” means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventive maintenance, careless or improper operation, or operator error.

III.P. Transfer of Ownership or Operation [40 CFR 71.7(d)(1)(iv)]

A change in ownership or operational control of this facility may be treated as an administrative permit amendment if the EPA determines no other change in this permit is necessary and provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to EPA.

III.Q. Off Permit Changes [40 CFR 63.10(f) and 40 CFR 71.6(a)(12) and 71.6(a)(3)(ii)]

The permittee is allowed to make certain changes without a permit revision, provided that the following requirements are met, and that all records required by this section are kept at the corporate headquarters in Durango, Colorado for a period of five (5) years:

1. Each change is not addressed or prohibited by this permit;
2. Each change shall meet with all applicable requirements and shall not violate any existing permit term or condition;
3. Changes under this provision may not include changes subject to any requirement of 40 CFR parts 72 through 78 or modifications under any provision of title I of the CAA;
4. The permittee must provide contemporaneous written notice to EPA of each change, except for changes that qualify as insignificant activities under §71.5(c)(11). The written notice must describe each change, the date of the change, any change in emissions, pollutants emitted, and any applicable requirements that would apply as a result of the change;
5. The permit shield does not apply to changes made under this provision;
6. The permittee must keep a record describing all changes that result in emissions of any regulated air pollutant subject to any applicable requirement not otherwise regulated under this permit, and the emissions resulting from those changes; and

7. For replacement of a permitted natural gas-fired compressor engine or electric generator with an engine or generator of the same make, model, horsepower rating, and configured to operate in the same manner as the engine being replaced, in addition to satisfying all other provisions for Off Permit Changes, the permittee satisfies the following provisions:
- a. The replacement natural gas-fired engine or generator employs air emissions control devices, monitoring, record keeping and reporting that are equivalent to those employed by the engine or generator being replaced;
 - b. The replacement of the existing natural gas-fired engine or generator does not constitute a major modification or major new source as defined in Federal PSD regulations (40 CFR 52.21);
 - c. No new applicable requirements, as defined in 40 CFR 71.2, are triggered by the replacement; and
 - d. The following information is provided in a written notice to EPA, in addition to the standard information listed above for contemporaneous written notices for off permit changes:
 - i. Make, model number, serial number, horsepower rating and configuration of the existing natural gas-fired engine or generator and the replacement engine or generator;
 - ii. Manufacture date, commence construction date (per the definition in 40 CFR 60.2, 60.4230(a) and 63.2), installation date, and start-up date of the replacement natural gas-fired engine or generator;
 - iii. If applicable, documentation of the cost to rebuild a replacement natural gas-fired engine or generator versus the cost to purchase a new natural gas-fired engine or generator in order to support claims that an engine or generator is not “reconstructed,” as defined in 40 CFR 60.15 and 40 CFR 63.2.
 - iv. 40 CFR part 60, subpart JJJJ (SI Engine NSPS) non-applicability documentation as appropriate;
 - v. 40 CFR part 63, subpart ZZZZ (RICE MACT) non-applicability documentation for major sources, as appropriate;
 - vi. 40 CFR part 63, subpart ZZZZ (RICE MACT) non-applicability documentation for area sources, as appropriate;
 - vii. Documentation to demonstrate that the replacement does not constitute a major new source or major modification, as defined in Federal PSD rules (40 CFR 52.21), as follows:
 - A. If the replacement will not constitute a “physical change or change in the method of operation” as described in §52.21(b)(2)(i), an explanation of how that conclusion was reached shall be provided.

- B. If the replacement will constitute a “physical change or change in the method of operation” as described §52.21(b)(2)(i), the following information shall be provided:

1. If the existing source is a “major stationary source” as defined in §52.21(b)(1): For each “regulated NSR pollutant” as defined in §52.21(b)(50), a demonstration (including all calculations) that the replacement will not be a “major modification” as defined in §52.21(b)(2). A modification is major only if it causes a “significant emissions increase” as defined in §52.21(b)(40), and also causes a “significant net emissions increase” as defined in §§52.21(b)(3) and (b)(23).

The procedures of §52.21(a)(2)(iv) shall be used to calculate whether or not there will be a significant emissions increase. If there will be a significant emissions increase, then calculations shall be provided to demonstrate there will not be a significant net emissions increase. These latter calculations shall include all sourcewide contemporaneous and creditable emission increases and decreases, as defined in §52.21(b)(3), summed with the PTE of the replacement unit(s).

If netting is used to demonstrate that the replacement will not constitute a “major modification,” verification shall be provided that the replacement engine(s) or turbine(s) employ emission controls at least equivalent in control effectiveness to those employed by the engine(s) or turbine(s) being replaced.

PTE of replacement unit(s) shall be determined based on the definition of PTE in §52.21(b)(4). For each “regulated NSR pollutant” for which the PTE is not “significant,” calculations used to reach that conclusion shall be provided.

2. If the existing source is not a “major stationary source” as defined in §52.21(b)(1): For each “regulated NSR pollutant,” a demonstration (including all calculations) that the replacement engine(s) or turbine(s), by itself, will not constitute a “major stationary source” as defined in §52.21(b)(1)(i).

8. The notice shall be kept at the corporate headquarters in Durango, Colorado and made available to EPA on request, in accordance with the general recordkeeping provision of this permit.

9. Submittal of the written notice required above shall not constitute a waiver, exemption, or shield from applicability of any applicable standard or PSD permitting requirements under 40 CFR 52.21 that would be triggered by the replacement of any one natural gas-fired engine or generator, or by replacement of multiple natural gas-fired engines or generators.

III.R. Permit Expiration and Renewal [40 CFR 71.5(a)(1)(iii), 71.5(a)(2), 71.5(c)(5), 71.6(a)(11), 71.7(b), 71.7(c)(1), and 71.7(c)(3)]

1. This permit shall expire upon the earlier occurrence of the following events:
 - a. Five (5) years elapses from the date of issuance; or
 - b. The source is issued a part 70 or part 71 permit under an EPA approved or delegated permit program.

[40 CFR 71.6(a)(11)]
2. Expiration of this permit terminates the permittee's right to operate unless a timely and complete permit renewal application has been submitted at least six (6) months but not more than eighteen (18) months prior to the date of expiration of this permit.

[40 CFR 71.5(a)(1)(iii)]
3. If the permittee submits a timely and complete permit application for renewal, consistent with §71.5(a)(2), but EPA has failed to issue or deny the renewal permit, then all the terms and conditions of the permit, including any permit shield granted pursuant to §71.6(f) shall remain in effect until the renewal permit has been issued or denied.

[40 CFR 71.7(c)(3)]
4. The permittee's failure to have a part 71 permit is not a violation of this part until EPA takes final action on the permit renewal application. This protection shall cease to apply if, subsequent to the completeness determination, the permittee fails to submit any additional information identified as being needed to process the application by the deadline specified in writing by EPA.

[40 CFR 71.7(b)]
5. Renewal of this permit is subject to the same procedural requirements that apply to initial permit issuance, including those for public participation, affected State, and Tribal review.

[40 CFR 71.7(c)(1)]
6. The application for renewal shall include the current permit number, description of permit revisions and off permit changes that occurred during the permit term, any applicable requirements that were promulgated and not incorporated into the permit during the permit term, and other information required by the application form.

[40 CFR 71.5(a)(2) and 71.5(c)(5)]

IV. Appendix

IV.A. Inspection Information

1. Driving Directions to Plant from Durango:

- From the intersection of Highway 160 and Highway 550, drive south on Hwy. 550 for approximately 12.2 miles. (All asphalt road.)
- Turn Left (east) on Indian Hwy./County Road 318 for approximately 3.2 miles. (All asphalt road; first 1 mile has an approximate 7% grade to climb.)
- Turn right (south) off Indian Hwy. Onto the dirt road for approximately 2.1 miles.
- Job site entrance is on the left.

Note: A SUIT crossing permit is required, where applicable.

2. Global Positioning System (GPS) Lat/Long Coordinates:

37° 02' 9.7"N by -107° 50' 48.3"W

3. Safety Considerations:

All visitors to the facility are expected to adhere to Red Cedar Gathering safety policies. Policies of particular concern are those regarding the Personal Protective Equipment (PPE) and performance of Hot Work. As posted at the entrance to the station, Red Cedar Gathering requires persons entering the site to wear a hard hat, safety glasses, safety toe footwear, hearing protection, and fire retardant clothing. Red Cedar Gathering also requires a permit be issued for the performance of any hot work at the station.
