A Common Issue:

Unsustainable Waste Disposal Practices

Throughout California and tribal lands, illegal dumping of solid and hazardous waste is an issue.

A Common Objective:

Improve Waste Management Practices and Infrastructure

Regional Coordination –

Tribes Continue to Work to Improve Waste Management Practices after Major Solid and Hazardous Waste Clean-Ups

Reservation. The dumps posed significant threats to residents of the Yurok Reservation, other

U.S. EPA Region 9 recently awarded \$86,350 in Resource Conservation Fund (RCF) grants to the Yurok and Karuk Tribes in Northern California. The Tribes will use the grant funds to increase material reuse and recycling, and improve solid waste management practices on their lands.

These awards follow large, multi-organization, solid and hazardous waste clean-up efforts that included the Yurok, Hoopa and Karuk Tribes, California Integrated Waste Management Board (CIWMB), U.S. EPA, Indian Health Services (IHS), United Indian Health Services (UIHS), California Rural Indian Health Board (CRIHB) and Humboldt Waste Management Authority.

Efforts to clean up major illegal dumps in the region

gained significant momentum in August 2008, when the CIWMB approved \$800,000 in funding to clean up three large illegal dump sites on the Yurok

Abandoned vehicles and scattered debris at Tully Creek. (Photo courtesy of CIWMB, 2008)

Successful Waste Management Efforts – Yurok, Karuk and Hoopa Tribes:

Moving Away from Open Dumping Towards Sustainable Waste Management Programs

Collaboration and Partnerships

- Yurok Tribe
- Karuk Tribe
- Hoopa Tribe

- State of California CalRecycles (CIWMB)
- U.S. Environmental Protection Agency
- U.S. Indian Health Services
- Humboldt Waste Management Authority
- United Indian Health Service
- California Rural Indian Health Board, Inc.

Collaboration and Partnerships, Cleaning Up Open Dumps

Over 200 tons of solid and hazardous waste were removed from creeks, including tires, appliances, batteries, flammable and toxic solids, and electronic wastes.

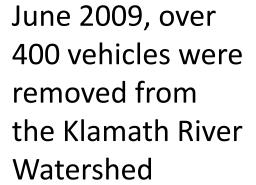

Collaboration and Partnerships, Cleaning Up Open Dumps

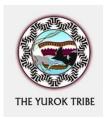

This site is approximately 2,500 ft above Mettah Creek which flows into the Klamath River. Mettah Creek is designated as critical salmon habitat.

Collaboration and Partnerships, Removing Abandoned Vehicles

Collaboration and Partnerships, Removing Household Hazardous Waste

In the Fall of 2009, the three Tribes conducted household hazardous waste collection.
