

WYOMING ANNUAL COMPLIANCE REPORT FOR CALENDAR YEAR 2010

I. Introduction

Section 1414(c)(3)(A)(1) of the amended Safe Drinking Water Act (SDWA) requires the U.S. Environmental Protection Agency (EPA) to prepare and make available to the public an annual report on violations of the National Primary Drinking Water Regulations by public water systems (PWSs) in the State of Wyoming each year. This report includes violations pertaining to: 1) maximum contaminant levels, 2) maximum residual disinfectant levels, 3) treatment requirements, 4) monitoring requirements determined to be significant by the Administrator, and 5) significant consumer confidence report requirements.

EPA Region 8 has primary enforcement authority in the State of Wyoming and thus prepared this annual compliance report. This report is intended to summarize and identify PWSs in the State of Wyoming that have been identified as having violations in categories 1- 5 above during the calendar year 2010. The source of the information contained in this report is the SDWIS/State database maintained by the EPA Region 8 Wyoming Direct Implementation Program.

II. The Drinking Water Program: An Overview

The EPA established the Public Water System Supervision (PWSS) Program under the authority of the 1974 Safe Drinking Water Act (SDWA). Under the SDWA and the 1986 Amendments, EPA sets national limits on contaminant levels in drinking water to ensure that the water is safe for human consumption. These limits are known as Maximum Contaminant Levels (MCLs) and Maximum Residual Disinfectant Levels (MRDLs). For some regulations, EPA establishes treatment techniques in lieu of an MCL to control unacceptable levels of contaminants in water. For example, treatment techniques have been established for viruses, some bacteria, and turbidity. The Agency also regulates how often public water systems monitor their water for contaminants and report the monitoring results to the states or EPA. Generally, the larger the population served by the water system, the more frequent the monitoring and reporting (M/R) requirements. In addition, EPA requires PWSs to monitor for unregulated contaminants to provide data for future regulatory development. Finally, EPA requires PWSs to notify their consumers when they have violated these regulations. The 1996 Amendments to the SDWA require consumer notification to include a clear and understandable explanation of the nature of the violation, its potential adverse health effects, steps that the PWS is undertaking to correct the violation and the possibility of alternative water supplies during the violation.

The SDWA applies to the 50 states, the District of Columbia, Indian Lands, Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

The SDWA allows states and territories to seek EPA approval to administer their own PWSS Programs. The authority to run a PWSS Program is called primacy. For a state to receive primacy, EPA must determine that the state meets certain requirements laid out in the SDWA and the regulations, including the adoption of drinking water regulations that are at least as stringent as the Federal regulations and a demonstration that they can enforce the program requirements. Of the 56 states and territories, all but Wyoming and the District of Columbia have primacy. The EPA Regional Offices administer the PWSS Programs within these two jurisdictions.

III. Public Water System

A Public Water System (PWS) is defined as a system that provides water via piping or other constructed conveyances for human consumption to at least 15 service connections or serves an average of at least 25 people for at least 60 days each year. There are three types of PWSs. PWSs can be community (such as towns), nontransient noncommunity (such as schools or factories on independent water sources), or transient noncommunity systems (such as rest stops or parks). For this report, the use of the acronym “PWS” means systems of all types unless specified in greater detail.

IV. Variances and Exemptions

During calendar year 2010, EPA Region 8 did not allow variances or exemptions for Wyoming public water systems:

V. Monitoring

A PWS is required to monitor and verify that the levels of contaminants present in the water do not exceed the MCL. If a PWS fails to have its water tested as required or fails to report test results correctly to the primacy agent, a monitoring violation occurs. For this report, significant monitoring violations are generally defined as any significant monitoring violation that occurred during the calendar year of the report. A significant monitoring violation, with rare exception, occurs when no samples were taken or no results were reported during a compliance period.

VI. Consumer Notification

Every Community Water System is required to deliver to its customers an annual Consumer Confidence Report. This report is to include some educational material, and will provide information on the source water, the levels of any detected contaminants, and compliance with drinking water regulations. For this report, a significant consumer notification violation occurred if a community water system completely failed to provide its customers the required annual report.

VII. Obtaining a Copy of the 2010 Public Water Systems Report

As required by the Safe Drinking Water Act, EPA Region 8 has made the 2010 Public Water Systems report available to the public for the State of Wyoming. Interested individuals can obtain a copy of the 2010 Annual Public Water Systems Report for the State of Wyoming by accessing:

Website: <http://www.epa.gov/region8/water/dwhome/wyomingdi.html>

Telephone: 303-312-6312 or 800-227-8917

E-Mail: r8eisc@epa.gov

Contact Name: EPA Region 8's Environmental Information Service Center

VIII. Violations Tables

The eight appendices in this report contain information on the State of Wyoming's water systems with significant violations in 2010.

The appendices are sorted by: 1) rule and 2) facility name.

Appendix A - Monitoring and Reporting violations for the total coliform rule (TCR)

Appendix B - Total coliform rule maximum contaminant level (TCR MCL) violations

Appendix C - Surface water treatment rule (SWTR) violations

Appendix D - Disinfection byproducts rule (DBP) violations

Appendix E - Chemical contaminants (inorganic contaminants or IOC, volatile organic contaminants or VOC, synthetic organic contaminants or SOC, nitrate or NO₃, and radiological contaminants or rads) violations

Appendix F - Lead and copper (Pb/Cu) violations

Appendix G – Ground Water Rule (GWR) violations

Appendix H - Consumer Confidence Report (CCR) violations

IX. Findings and Conclusions

Bacteriological Contaminants

- There were a total of 84 monitoring/reporting violations of the total coliform rule (TCR) by 73 public water systems out of a total of approximately 787 public water systems in the State of Wyoming (see Appendix A).
- There were a total of 48 monthly maximum contaminant level (MCL) violations of the total coliform rule by 41 public water systems (see Appendix B).

Surface Water Treatment Rules

- There were 4 treatment technique violations of the surface water treatment rule (SWTR) by 2 public water systems (see Appendix C).

Disinfection Byproducts

- There were 5 monitoring/reporting violations for disinfection byproducts (DBP) by 5 public water systems (see Appendix D).
- There were 8 maximum contaminant level violations for 3 water systems (see Appendix D).
- There were 7 monitoring/reporting violations of the maximum residual disinfection level by 7 water systems (see Appendix D).
- There were no treatment technique violations of the DBP rule by any water systems.

Chemical Contaminants (IOC, VOC, SOC, NO₃, and rads)

- There were 93 monitoring/reporting violations for chemical contaminants (IOC, VOC, SOC, NO₃, and rads) by 73 public water systems (see Appendix E). 62 of these violations were for nitrate.
- There were 7 maximum contaminant level violations for 4 water systems (see Appendix E).

Lead and Copper Rule

- There were 21 monitoring/reporting violations for the lead and copper rule (PbCu) by 21 public water systems (see Appendix F).

Ground Water Rule

- There were 5 monitoring/reporting violations for the ground water rule (GWR) by 5 public water systems (see Appendix G).

Consumer Confidence Report

- There were 6 public water systems that did not submit their Consumer Confidence Reports (CCR) for calendar year 2009 during 2010 (see Appendix H).

X. 2010 Annual Compliance Report Summary

- A total of 288 SDWA major rule violations were committed by 190 public water systems in the State of Wyoming, during calendar year 2010.

2010 SDWA VIOLATIONS SUMMARY TABLE		
Rule	Violation	Number of Violations
Total Coliform Rule (TCR)	Failure to Monitor or Report (M/R)	84
	Max Contaminant Level (MCL)	48
	Acute Max Contaminant Level	0
Surface Water Treatment Rule (SWTR)	M/R SWTR	0
	Treatment Technique	4
Disinfection Byproducts Rule (DBP)	Maximum Residual Disinfectant Level	7
	M/R DBP	5
	Max Contaminant Level	8
Chemicals (VOCs, SOCs, IOCs, Nitrate, and Radionuclides)	FTM/R	93
	MCL	7
Lead and Copper Rule (PbCu)	Follow up or Routine M/R	19
	Initial Tap Sampling	2
Ground Water Rule	Failure to Monitor or Report (M/R)	5
Consumer Confidence Report (CCR)	Failure to Report	6
Total Number of PWS Rule Violations		288
Total number of PWSs with violations		190

WYOMING 2010 COMPLIANCE REPORT										
Violation Category	MCL		Acute MCL		Treatment Techniques		Significant Monitoring		Maximum Residual Disinfectant Level

XI. General Information on the Inventory of Public Water Systems in the State of Wyoming

There were 787 public water systems in the State of Wyoming in 2010.

- The numbers, sizes, and types of public water systems in the State of Wyoming in the calendar year 2010 are as follows:

	<3,300	3,301 - 50,000	>50,000
Community	288	21	2
Non-Community	384	2	0
NTNC	90	0	0

- The percentage of public water systems that are of each size and type in the State of Wyoming in the calendar year 2010 are as follows:

	<3,300	3,301 - 50,000	>50,000
Percentage (%)	96.8	2.9	.3

	Community	Non-Community	NTNC
Percentage (%)	39.5	49.0	11.5

- The total number of customers served by public water systems in the State of Wyoming in the calendar year 2010 was 547,598.
- The sources of the State of Wyoming drinking water are surface water, ground water, ground water under the influence of surface water, purchased surface water, and purchased ground water.
- 76% of public water systems in the State of Wyoming in the calendar year 2010 were in compliance for federal drinking water regulations.
