

LEARN Before You Burn

1

Burn the right wood

Burn only dry, well-seasoned wood that has been split and stored properly.

2

The right way

The right way is hot and bright.

3

In the right appliance

The right appliance is an EPA-approved appliance, inspected annually by a certified chimney sweep.

Wood-Burning Safety Starts with You!

Have you scheduled your
annual inspection?

The National Fire Protection Association estimates that 25 percent of home heating fires are caused primarily by creosote buildup in the chimney.

Make your home healthier and safer. A properly installed and maintained appliance burns more efficiently and saves you money. Contact your local certified chimney sweep to **schedule an annual inspection today.**
