

# EPA's BEACH Report: Indiana 2006 Swimming Season

June 2007

## Introduction

The BEACH Act of 2000 requires that coastal and Great Lakes states and territories report to EPA on beach monitoring and notification data for their coastal recreation waters. The BEACH Act defines coastal recreation waters as the Great Lakes and coastal waters (including coastal estuaries) that states, territories, and authorized tribes officially recognize or designate for swimming, bathing, surfing, or similar activities in the water.

This fact sheet summarizes beach monitoring and notification data submitted to EPA by the State of Indiana for the 2006 swimming season.

**Figure 1. Indiana coastal counties with 2006 monitored beach data.**

**Table 1. Breakdown of monitored and unmonitored coastal beaches by county.**

County	Total Beaches	Monitored	Not Monitored
LA PORTE	10	10	0
LAKE	9	9	0
PORTER	10	10	0
<b>TOTALS</b>	<b>29</b>	<b>29</b>	<b>0</b>

## 2006 Summary Results

### How many beaches had notification actions?

When monitoring of water at beaches shows that levels of certain bacteria exceed standards, Indiana's beach managers post a beach advisory, warning people of the possible risks of swimming, or formally notify the public that the beach is closed. Of the 29 coastal beaches that were monitored in 2006, 15, or 52 percent, had at least one advisory during the 2006 season (Figure 2).

### How many notification actions were reported and how long were they?

A total of 58 beach notification actions were reported in the 2006 swimming season. Actions were of relatively short duration, however. Figure 3 presents breakdowns of action durations.

### What percentage of days were beaches under a notification action?

For Indiana's 2006 swimming season, EPA determined there were a total of 3,006 beach days associated with the 29 monitored beaches. Actions were reported on 97 of those days or about 3 percent of the time (Figure 4).

### How do 2006 results compare to previous years?

Beginning in 2003, states are required to submit data to EPA under the BEACH Act for beaches which are in coastal and Great Lakes waters. Table 2 compares 2006 data with data reported in previous years.
