WATER STANDARDS &  
FACILITY REGULATION

Dear Mr. Furlan:

In response to your letter dated March 18, 2011, the Kiski Valley Water Pollution Control Authority (KVWPCA) does not directly receive Marcellus Shale drilling process water. KVWPCA receives some Marcellus Shale water from McCutcheon Enterprises, Inc., via a sewer line. McCutcheon Enterprises receives, processes, and discharges various wastes including Marcellus Shale water per their (USEPA Industrial Pretreatment Program) Centralized Waste Treatment Facility Permit and their PADEP Solids Waste Permit.

Please clarify if KVWPCA is still requested to perform the voluntary testing per your letter since KVWPCA does not receive the Marcellus Shale water directly from a hauler. Also attached is a letter I sent to the PADEP Pittsburgh office requesting guidance concerning the acceptance of Marcellus Shale water from McCutcheon Enterprises, Inc. for your review.

Sincerely,

A handwritten signature in dark ink, appearing to read "Robert N. Kossak".

Robert N. Kossak  
Authority Manager
