N.1	SUBPART BB EQUIPMENT LEAKS .....	N-1

## **N.1 SUBPART BB EQUIPMENT LEAKS**

The Subpart BB regulations are applicable to equipment that contains or contacts hazardous wastes with organic concentrations of at least ten (10) percent by weight.

The Subpart BB regulations further define equipment as being in light liquid service, gas/vapor service, and heavy liquid service. The Parker facility has determined that the Subpart BB requirements are not applicable, based on the characteristics of the spent carbon managed at the facility. This determination is based on review of waste profile information, along with periodic analytical confirmation using SW-846 Method 8260B, in accordance with the requirements of 264.1063(d)(2).
